NOTE

o Descriptions herein contained may be subject to improvement changes without notice.

INTRODUCTION OF THE OWNER'S MANUAL

SEGA ENTERPRISES, LTD., supported by its high electronic technology of LSIs, microprocessors, etc. and a wealth of experience, has for more than 30 years been supplying various innovative and popular game machines to the world market. This OWNER'S manual is intended to provide detailed comments together with all the necessary information covering the operation in general of electronic assemblies, electromechanicals servicing control, spare parts, etc. as regards the AFTER BURNER a new SEGA product. The manual is intended for those who have knowledge of electricity and technical expertise especially in ICs, CRTs, microprocessors, etc. Carefully read so as to acquire sufficient knowledge before working on the machine. Should there be a malfunction, non-technical personnel should under no circumstance touch the interior system.

1. HANDLING PRECAUTIONS

When installing or inspecting, be very careful of the following points and pay attention to ensure that the player can enjoy the game safely.

- o Be sure to turn the power off before working on the machine.
- o To insert or pull out the plug quickly is dangerous.
- o It is necessary to make sure that the power cord or the grounding wire is not exposed on the road, etc. in a manner so as to be dangerous. Make sure that grounding connections are made safely at the position where so specified.
- o Do not use any fuse that does not meet the specified rating.
- o Make complete connections for the IC board and other connecters. Insufficient insertion is very dangerous.

Also, for the IC board circuit inspections, only the logic tone is allowed. The use of a tester is not permitted, so be careful in this regard. After confirming that there are no irregularities, turn the power ON.

2. PREVENTION OF COUNTERFEITING AND CONVERSION

LABELLING

To prevent counterfeits and conversions, the following labels are put on all the SEGA products. When handling such goods, be sure to confirm the labels. They are used to prevent illegal acts such as the unauthorized copying of the products and the printed circuit boards thereof or carrying on business by manufacturing similar merchandise or by converting, selling or using such products or printed circuit boards.

ORIGINAL SEAL

The following seal is put on the machines manufactured by SEGA.

LICENSE SEAL

The following seal is put on the kits, such as the printed circuit boards, of SEGA products.

COPYRIGHT NOTICE

This SEGA product has the copyright notice as follows:

(C) SEGA 1987

This signifies that this work was disclosed in 1987 and is the property of SEGA ENTERPRISES, LTD.

3. PRECAUTIONS CONCERNING THE PLACE OF INSTALLATION

The AFTER BURNER is an indoor game machine. Absolutely do not install it outside. Even indoors, avoid installing in places mentioned below so as to ensure proper usage:

- o Places subject to rain or water leakage, or condensation due to humidity.
- o In the proximity of an indoor swimming pool and/or shower.
- o Places subject to direct sunlight.
- o Places subject to heat sources from heating units, etc., or hot air.
- o Vicinity of highly inflammable/volatile chemicals or hazardous matter.
- o Sloped surfaces.
- o Vicinity of anti-disaster facilities such us fire exits and fire extinguishers.
- o Places subject to any type of violent impact.
- o Dusty places.

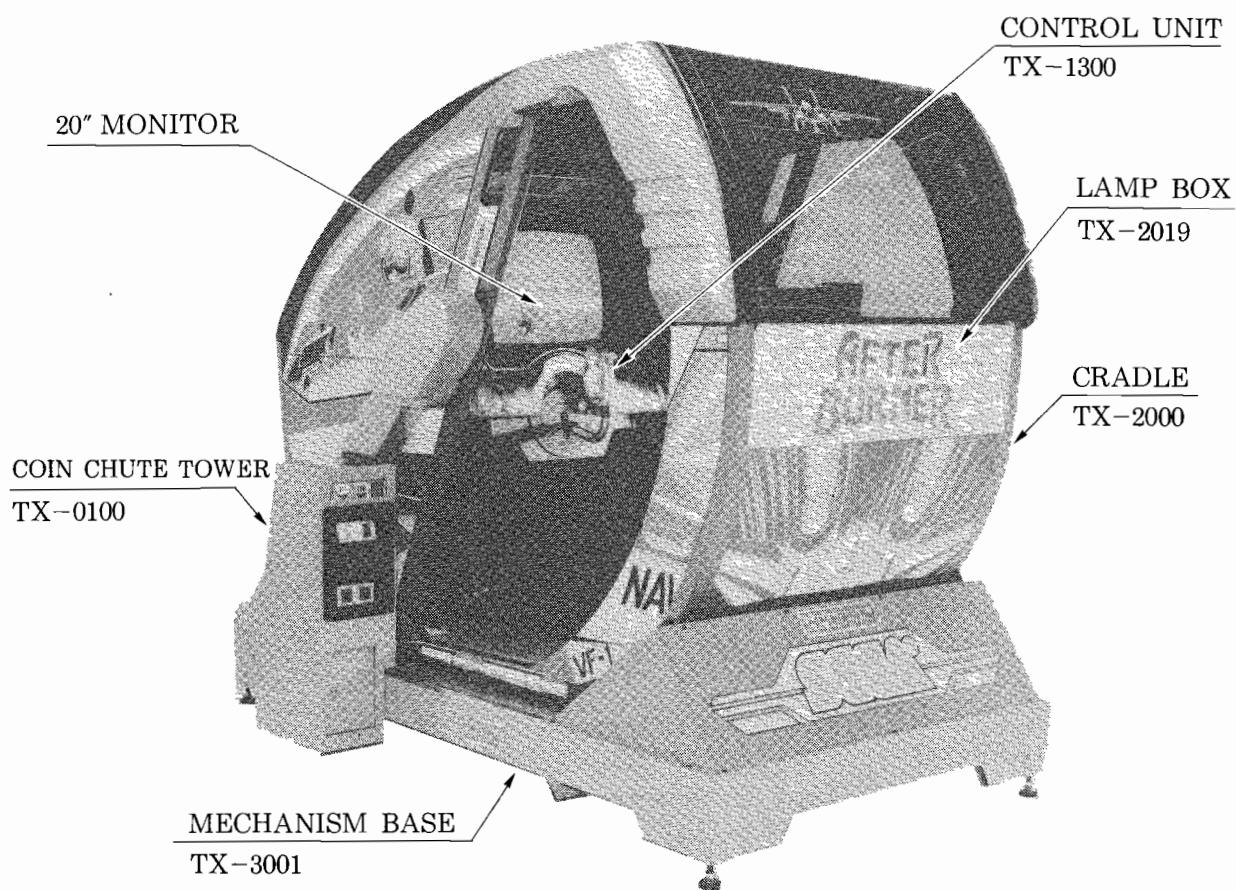

PRECAUTIONS FOR INSTALLATION

1. For purposes of your customers' safety and protection, providing the TX-0023 GUARD FENCE (optional) around the machine's immediate surrounding area is recommended.
2. Make sure that the power supply outlet is used exclusively for the AFTER BURNER. (The outlet's simultaneous use for other machine(s) may cause the breaker to break when the power consumption exceeds the maximum).
3. An extension cord used shall be of a 15A rated current or higher.

The machine's consumption current

Rated current	:	1A (100V AC)
(standby)		
Maximum	:	15A (100V AC)
During game play: 2.5 15A (100V AC)		

4. NAME OF PARTS

M5 540-0007-01

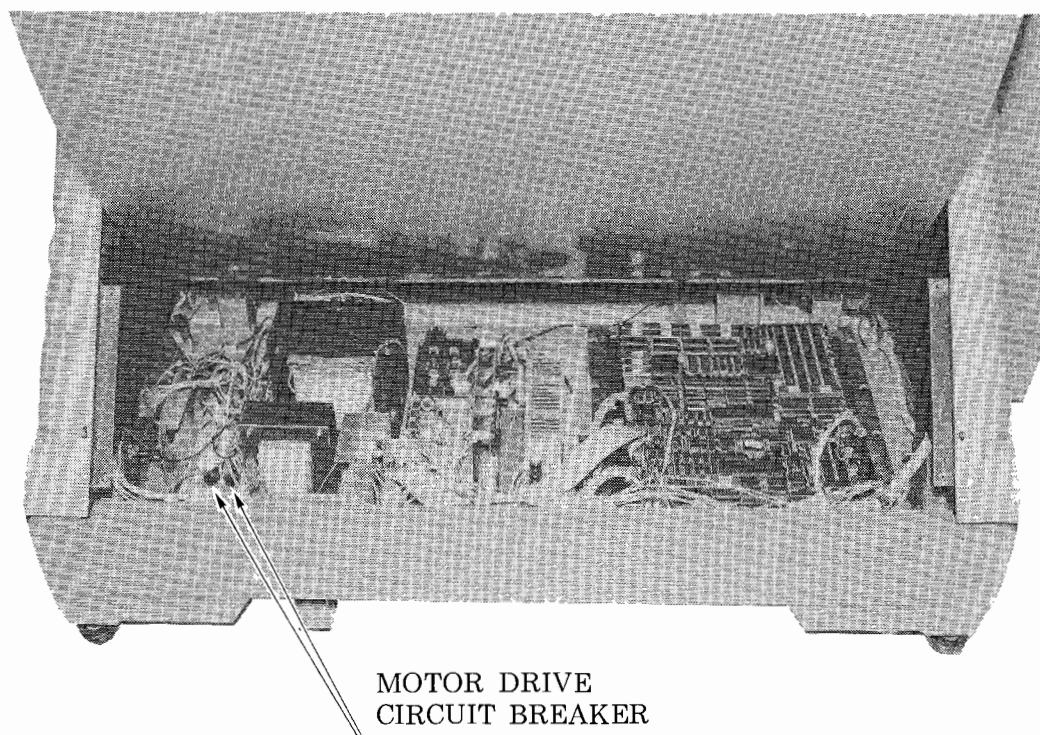

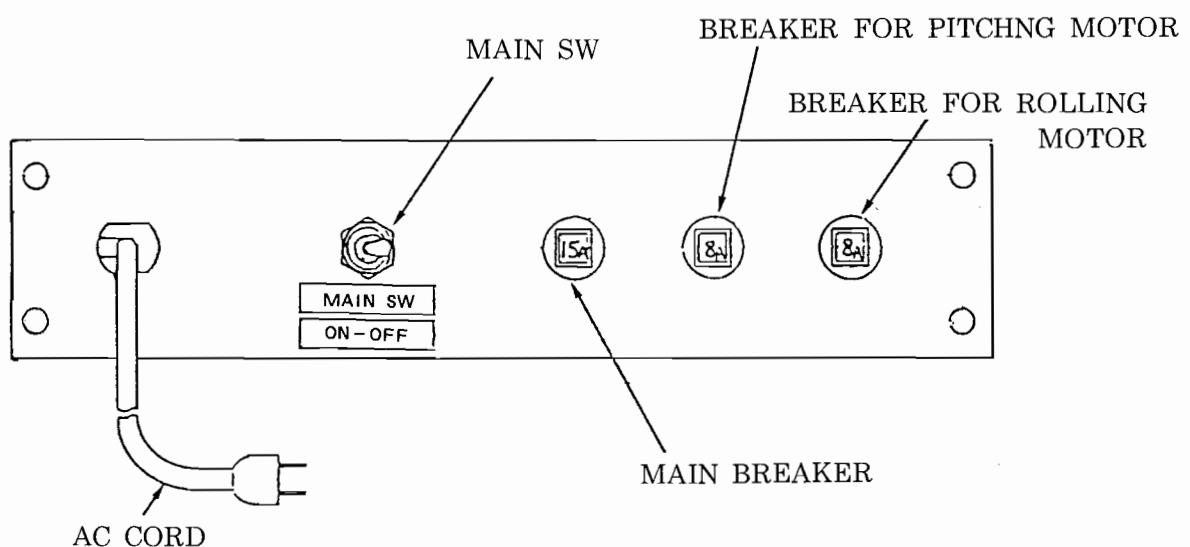

(TAMPERPROOF DRIVER)

M4 540-0018
M5 540-0017

5. BREAKER

When the machine is overloaded, the breaker functions and the machine will stop. In such a case, check the breaker shown below, and if it is protruding, this signifies that the breaker has performed its function. After finishing checking, push it forward to restore the breaker to its original position.

MOTOR DRIVE
CIRCUIT BREAKER

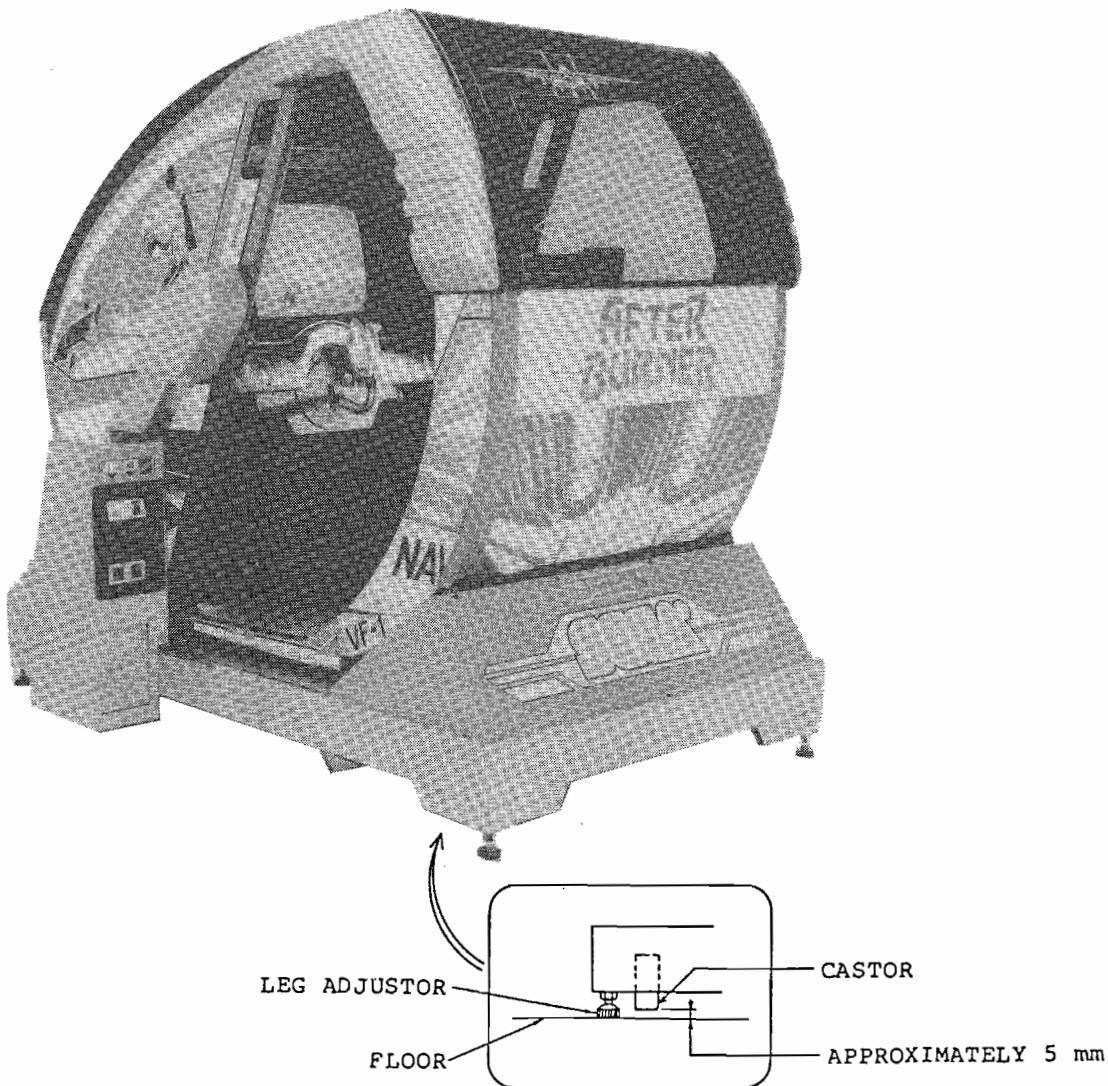

6. PRECAUTIONS FOR INSTALLING AND MOVING THE MACHINE

PRECAUTIONS FOR INSTALLATION

The machine is provided with 4 castors and 4 adjusters. When installing, make sure that the clearance between the floor and the castor is approximately 5 mm (if the clearance is insufficient, the machine will move and thus create a dangerous situation).

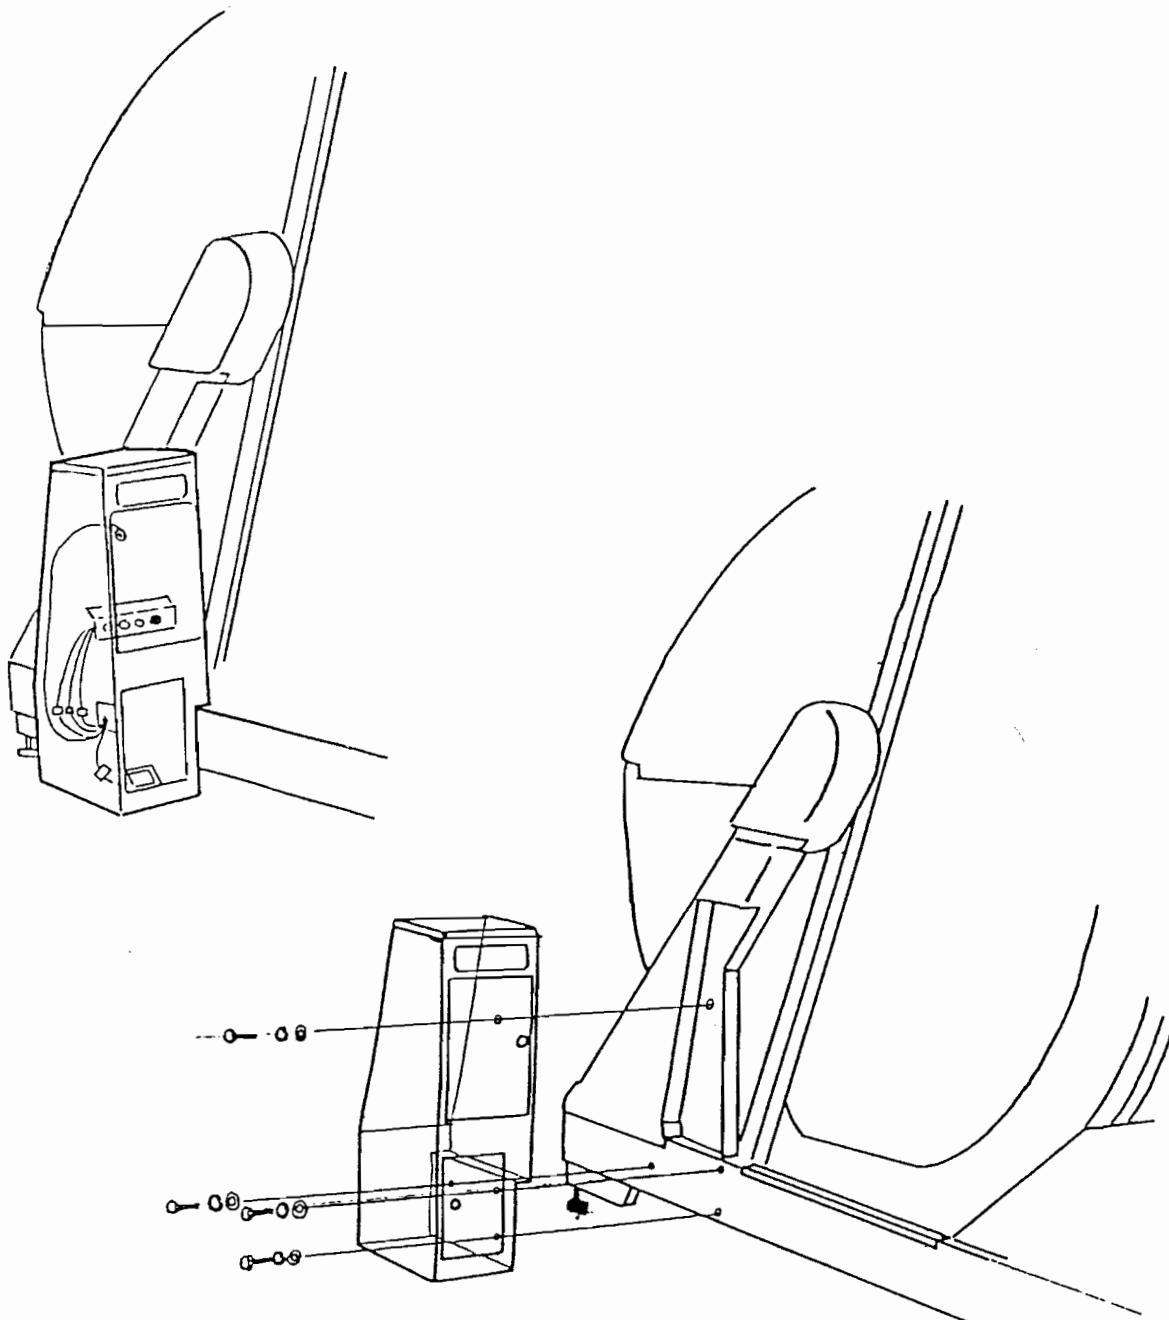

MOVING THE MACHINE

The machine weighs approximately 430 kg. (946 lbs.) and as such, you should lift up the leg adjuster when moving it about on the floor.

7. REMOVING THE COIN CHUTE TOWER

- (1) Disconnect the 4 connectors inside the coin chute tower and the earth wire attached to the coin chute door.
- (2) Take off the 4 (M8) bolts to separate the COIN CHUTE TOWER from the base.

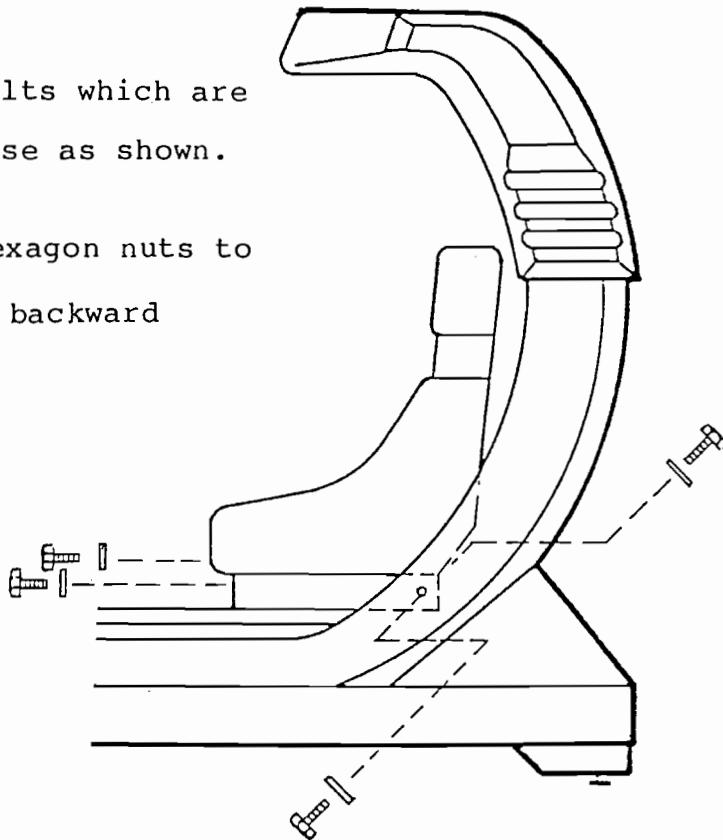

8. ADJUSTING THE SEAT POSITION

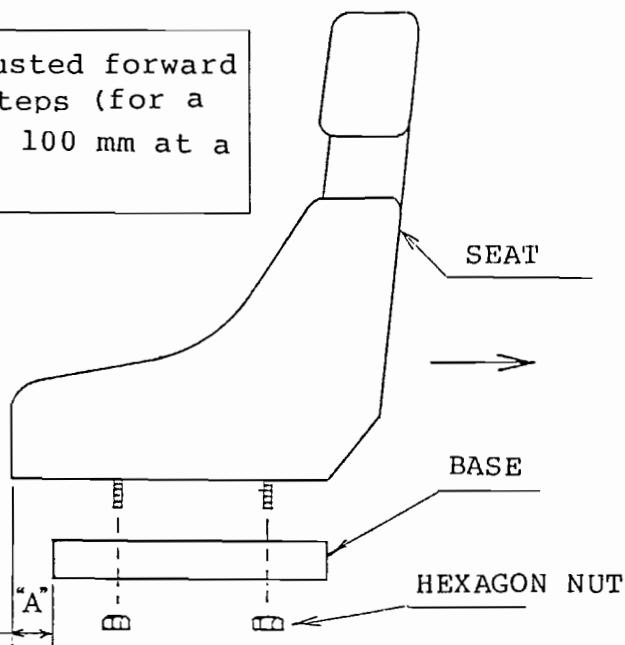

The machine's seat position is set at the time of shipment. To adjust, follow the procedure below:

PROCEDURE

1. Take off the 4 bolts which are secured to the base as shown.
2. Take off the 4 hexagon nuts to make forward and backward adjustments.

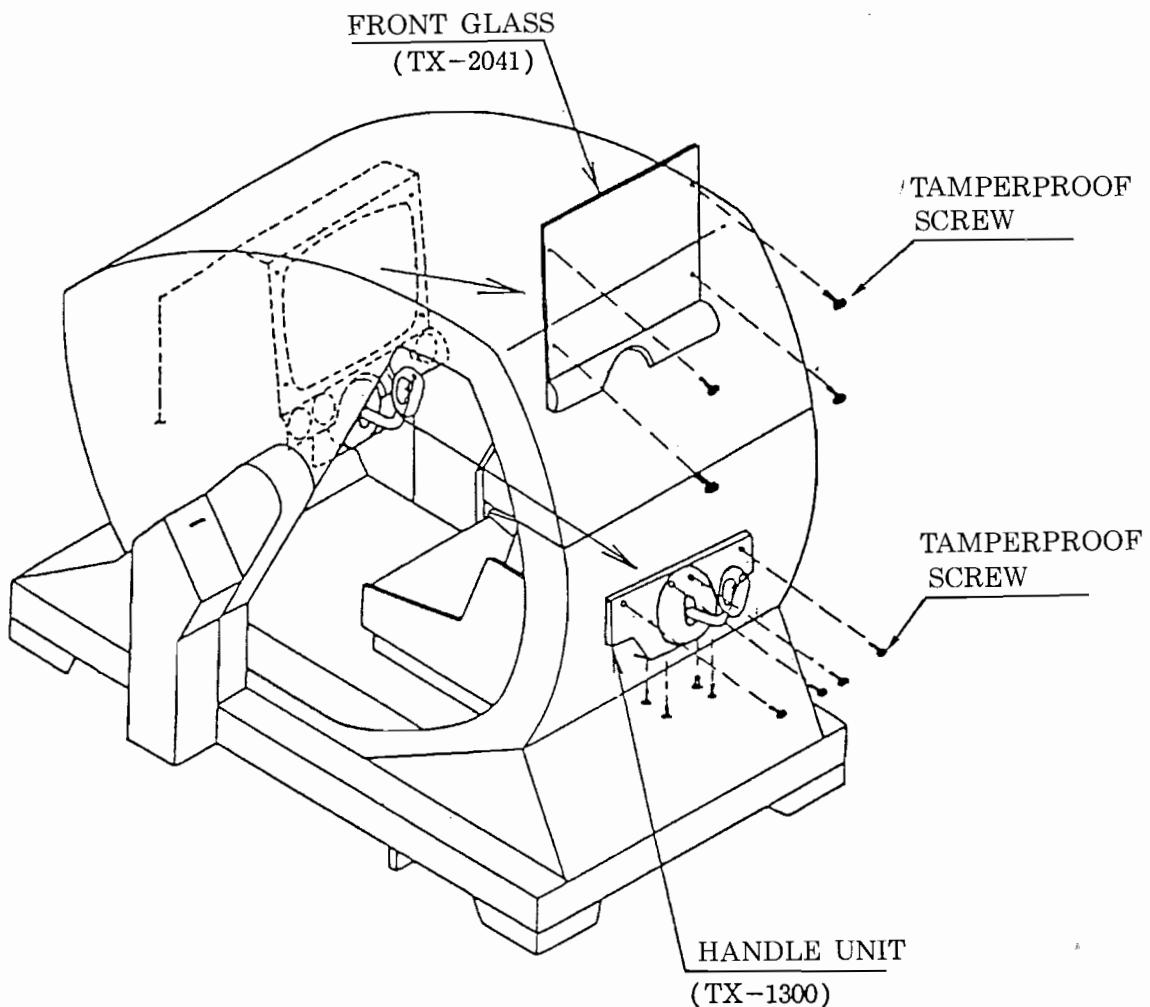

The seat can be adjusted forward and backward in 5 steps (for a maximum distance of 100 mm at a 25 mm pitch).

The seat adjustment can be made forward and backward in 5 steps.

9. REMOVING THE HANDLE UNIT

- ① Remove the front glass from the cabinet by taking off the 4 (M5 x 25) tamperproof screws.
- ② Carefully pull out the handle unit towards you by taking off the 4 front side and 4 bottom tamperproof screws which secure the handle unit.
- ③ Remove the handle unit from the cabinet by taking off the connectors (4P orange and 6P orange) and the earth wire.

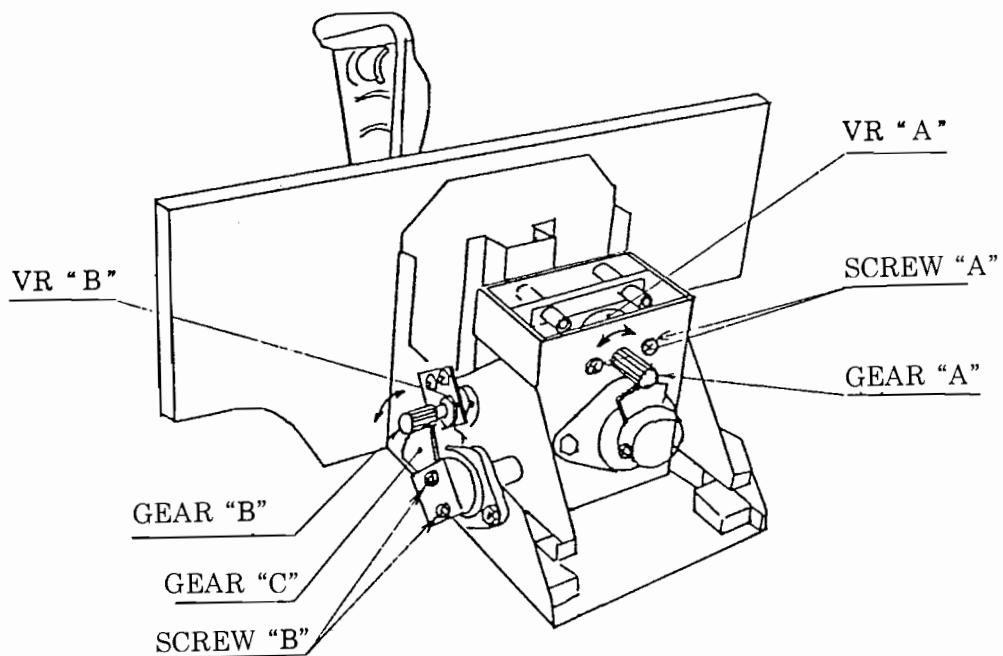

10. ADJUSTING THE HANDLE UNIT

In the test mode, cause the DIAGNOSTIC INPUT DISPLAY to appear on the screen (to select it, push the test switch and move the handle upward and downward).

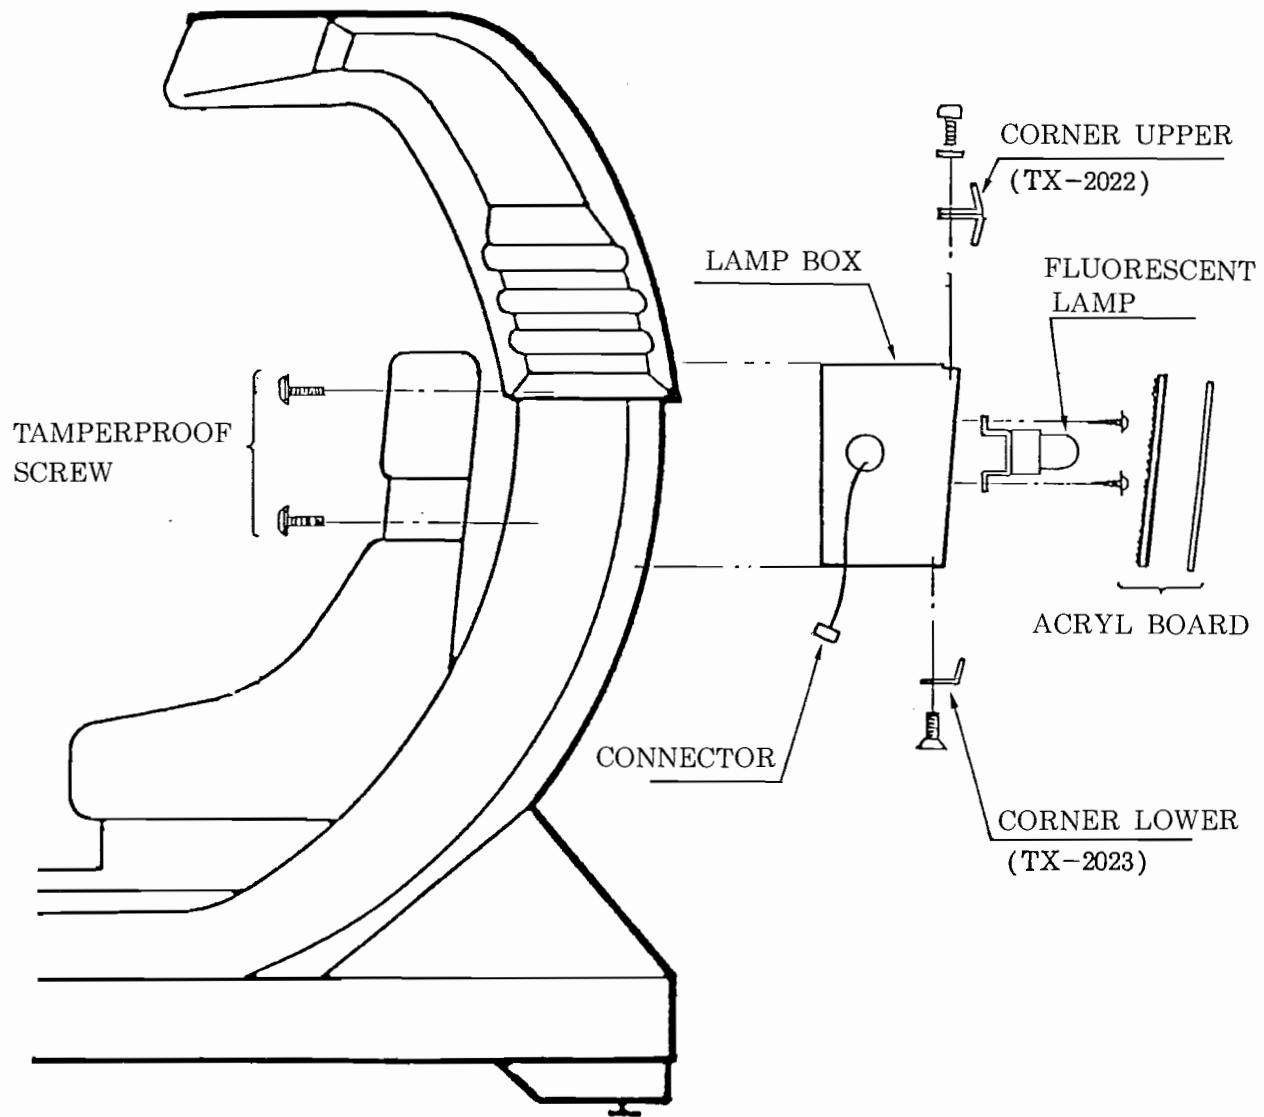

DIAGNOSTIC INPUT TEST		
COIN #1 OFF	START	OFF
COIN #2 OFF	SERVICE	OFF
VALCAN	OFF	
MISSILE	OFF	
STICK	RIGHT LEFT	80H ①
STICK	UP DOWN	80H ②
SPEED		80H

- (1) To make VR adjustments in a horizontal direction (RIGHT/LEFT), release the VR "A" bracket's "A" screws and turn gear "A" in a manner so that when the handle grip is in an unoperated status, $80H \pm 2H$ is obtained. At this time, also make backlash adjustments.
- (2) When making vertical (UP/DOWN) adjustments, while maintaining the present inclination of the handle unit, unfasten the gear "C" bracket's "B" screws and fasten the gear "C" bracket when the monitor display shows $80H \pm 2H$. For backlash adjustments, loosen the VR "B" bracket.

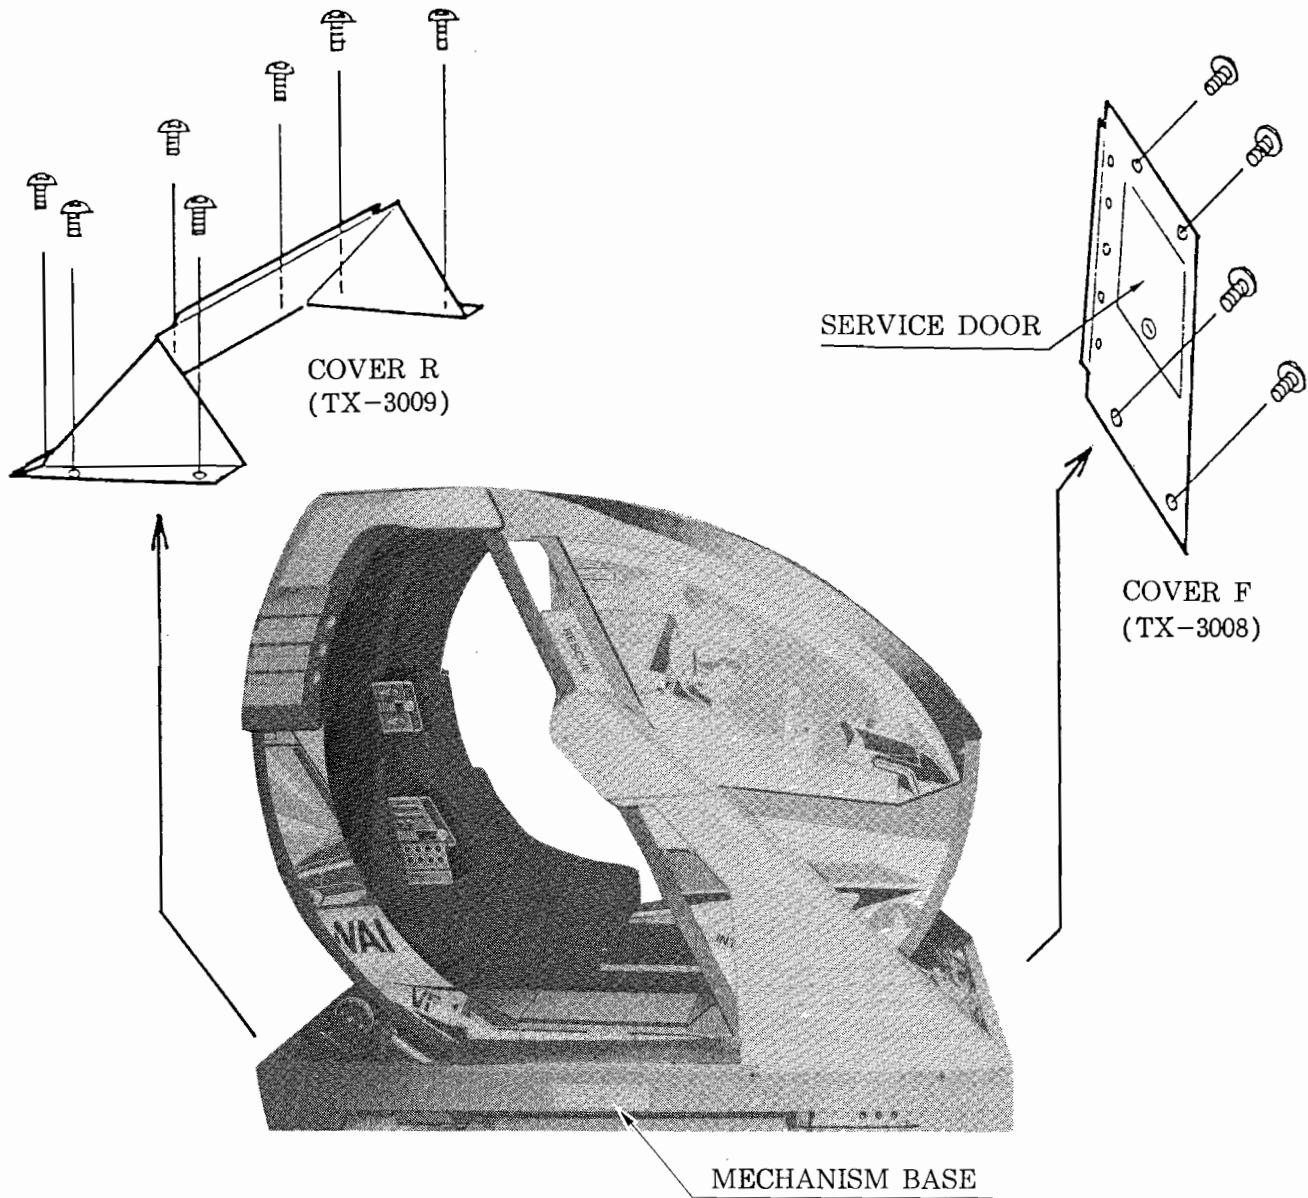

11. REMOVING THE LAMP BOX

- ① Loosen each of the 4 tamperproof screws (M4 x 30) located behind the seat approximately 5 mm.
- ② Push the tamperproof screws' heads with a screwdriver in a manner so that the lamp box is pushed outside, and then completely take off the tamperproof screws.
- ③ Pull out the lamp box and disconnect the connectors to allow the lamp box to be separated from the cabinet.
- ④ Remove the acryl board by taking off the CORNER UPPER and the CORNER LOWER.

12. OPENING THE MECHANISM BASE

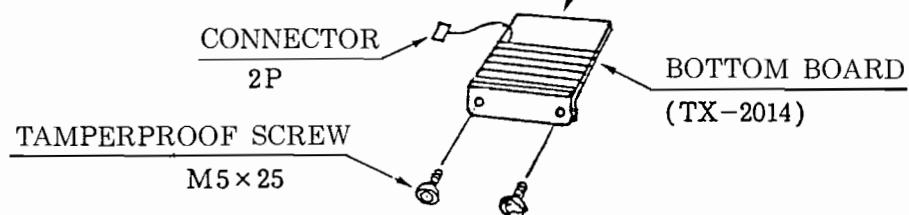

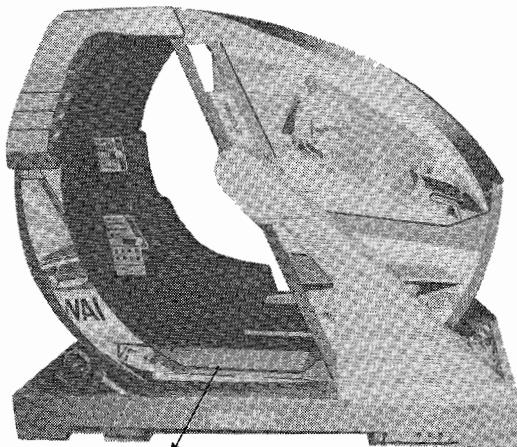

- A motor, main IC board and the ASSY power supply are contained inside the mechanism base.
- When servicing of the IC board and ASSY power supply is required, open COVER "F" by taking off the 4 (M5 x 10) tamperproof screws. The IC board can be replaced merely by opening the service door.
- When motor mechanism service is necessary, open COVER "R" by taking off the 7 (M5 x 10) tamperproof screws.

13. REMOVING THE ROLLING MOTOR UNIT

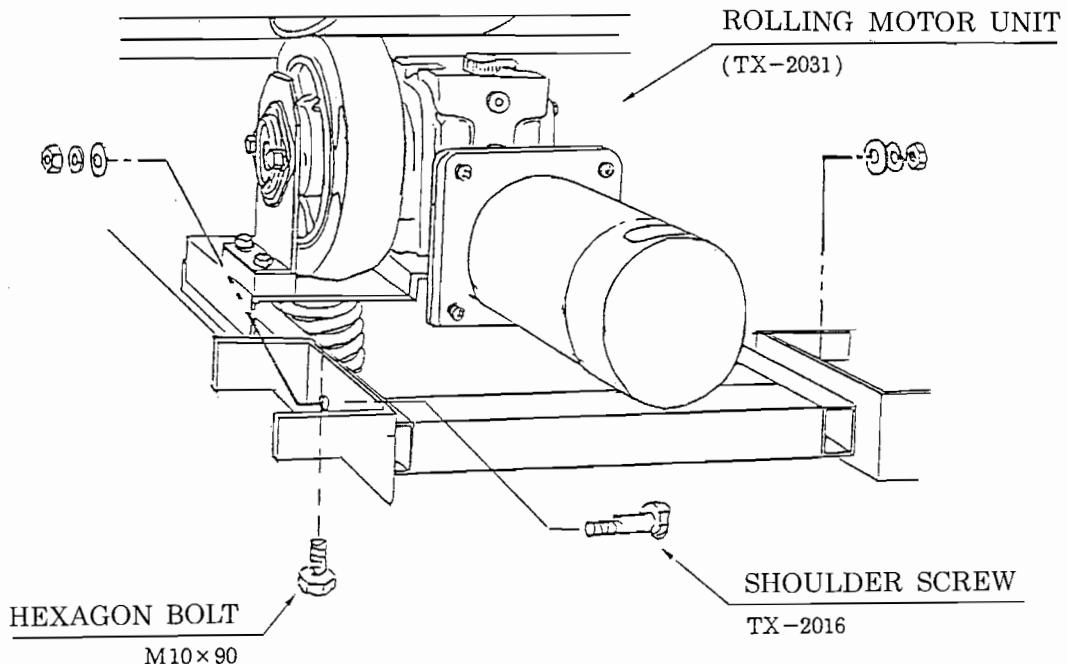

① Pull out the bottom board (TX-2014) towards you by taking off the 2 (M5 x 25) tamperproof screws.

② Disconnect the 2P connector, remove the bottom board, and you will see the rolling motor.

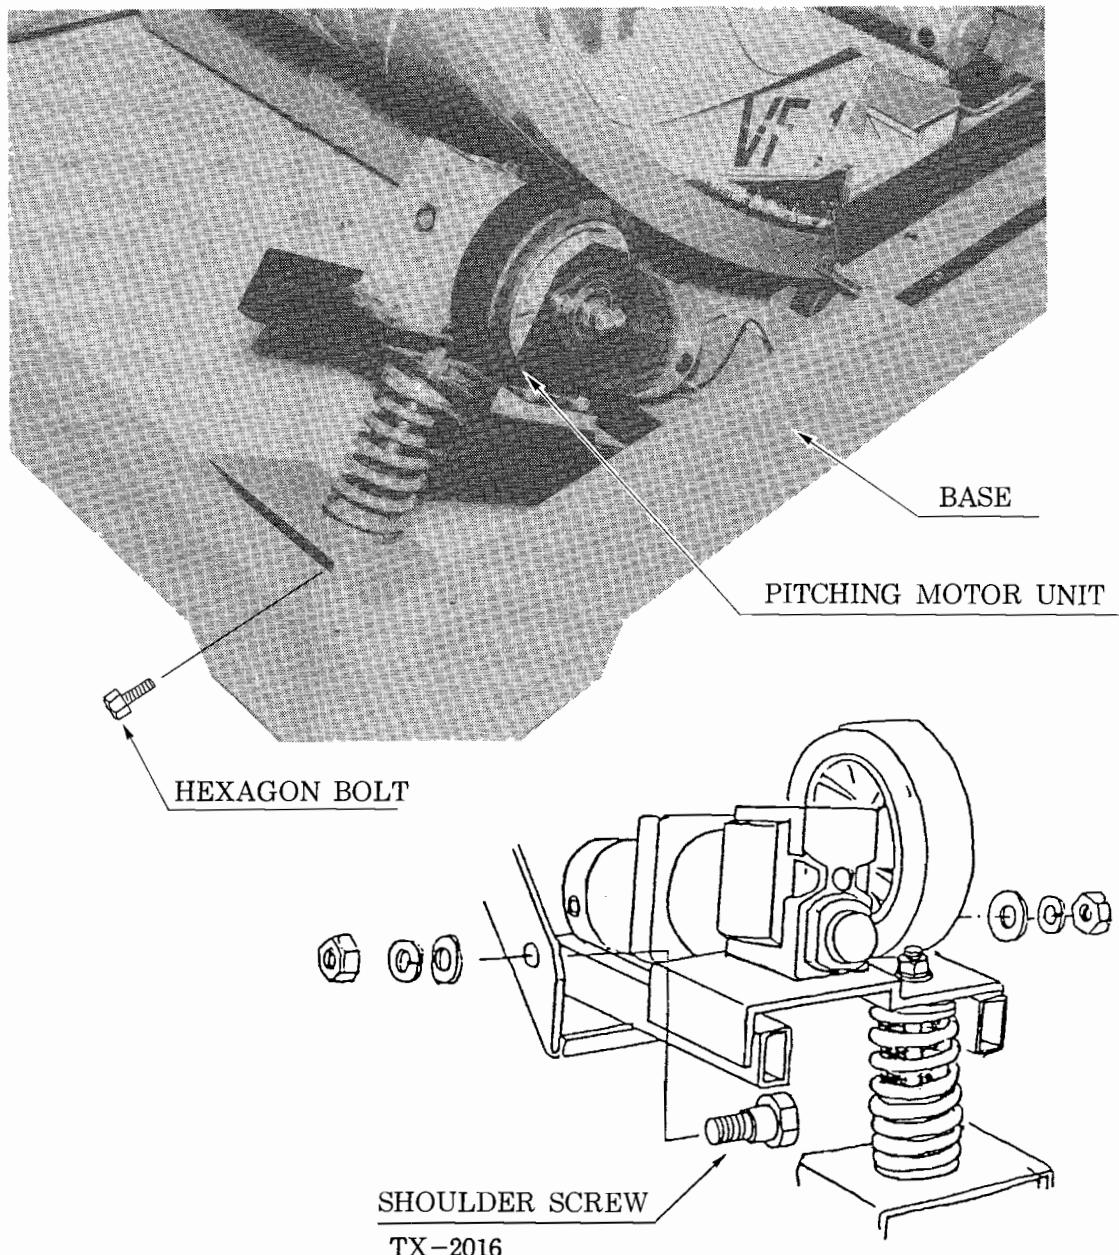

③ To remove the rolling motor unit, first compress the spring by fastening the hexagon bolt (an accessory item) to cause the tire to separate from the gondola.

④ Next, push the shoulder screws' heads, take off the hexagonal nuts, pull out the shoulder screws, and remove the motor unit from the mechanism base.

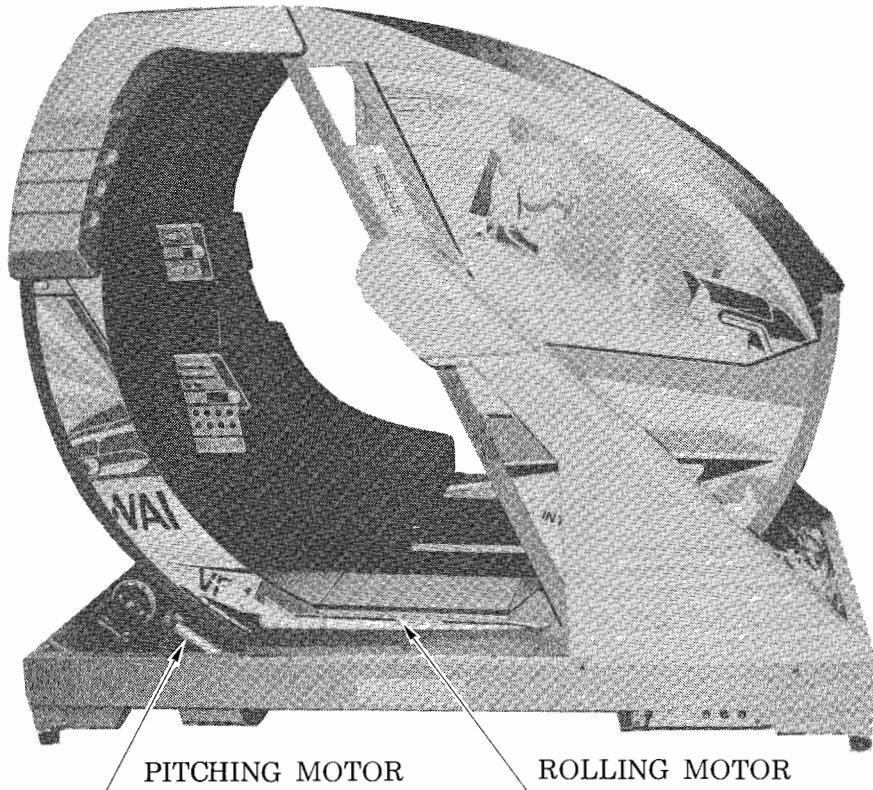

14. REMOVING THE PITCHING MOTOR UNIT

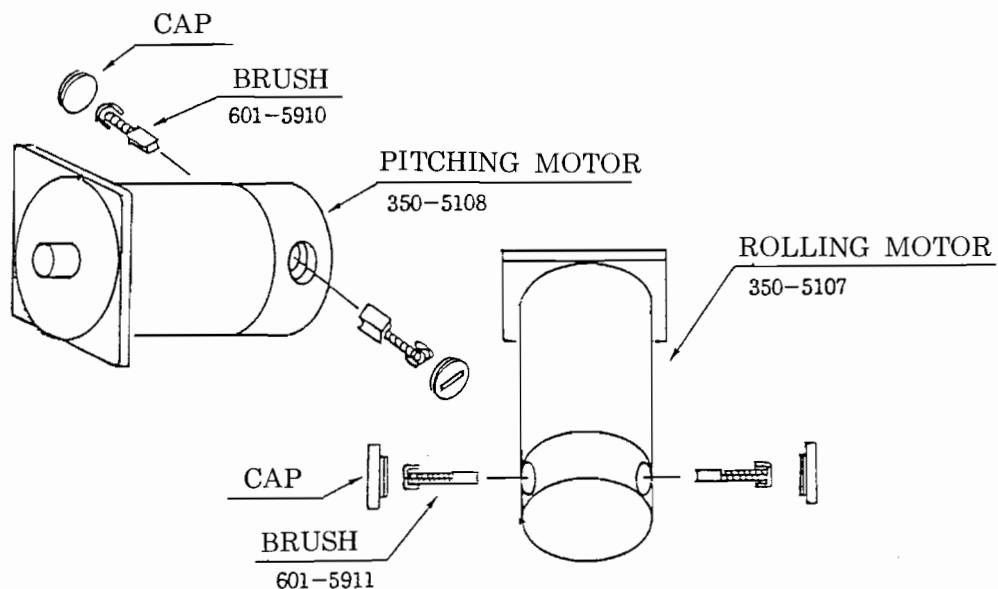

- (1) Compress the spring by fastening the (M10 x 90) hexagon bolt (an accessory item) so as to allow the tire to be separated from the hoop.
- (2) Push the shoulder screws' (TX-2016) heads, take off the hexagon nuts, pull out the shoulder screws, and remove the motor unit from the base.

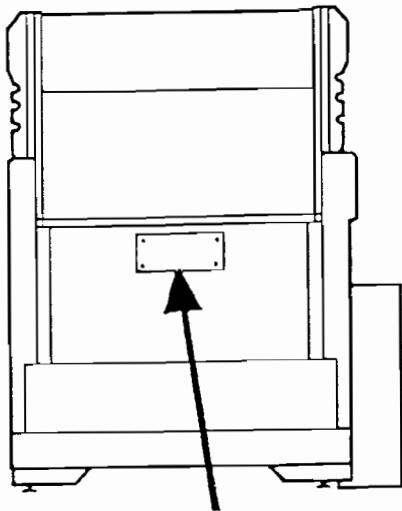

15. REPLACING THE MOTOR BRUSHES

To replace the motor brushes, release the cap with a screwdriver, etc. and take out the brushes. Replacement once every 6 months is recommended. Make sure that both brushes are simultaneously replaced.

16. ROLLING ADJUSTMENTS

SERVICE DOOR

Take off the 4 tamperproof screws to open the cabinet's service door.

MOTOR TEST

MOTOR POWER OFF

POWER LEVEL 1 to 5 01

MOTOR POSITION

RIGHT , LEFT 80

UP , DOWN 80

LIMIT SW OFF,,0 0
ON,,,1 0 0
0

MOTOR POWER ON ,,, VALCAN SW
POWER LEVEL SELECT ,,, START SW

Push the test SW to select the test mode and then move the handle upward and downward (UP/DOWN) to select MOTOR TEST, making sure that the screen display is as shown.

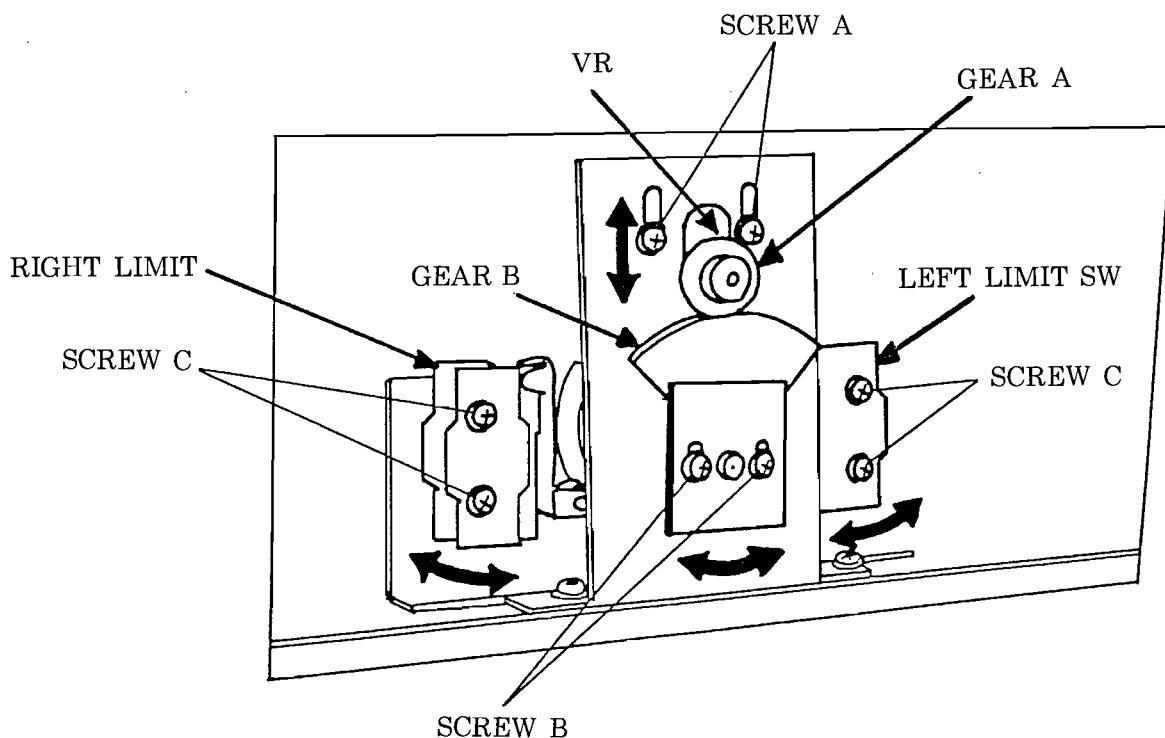

* When performing the LIMIT SW and VR (variable resistor) adjustments, adjust the VR first (in order to make proper adjustments to the LIMIT SWITCH, the VR adjustments should be correct).

o VR ADJUSTMENT

While pushing the handle grip's trigger switch, horizontally move the gondola and stop it in the visual level position in a manner so that the monitor frame is parallel with the front glass frame. At this time, adjust the gear position so as to obtain a RIGHT, LEFT value of 80H(\pm 2H).

LIMIT SW ADJUSTMENT

Loosen screw C and move the limit switch to make adjustments.

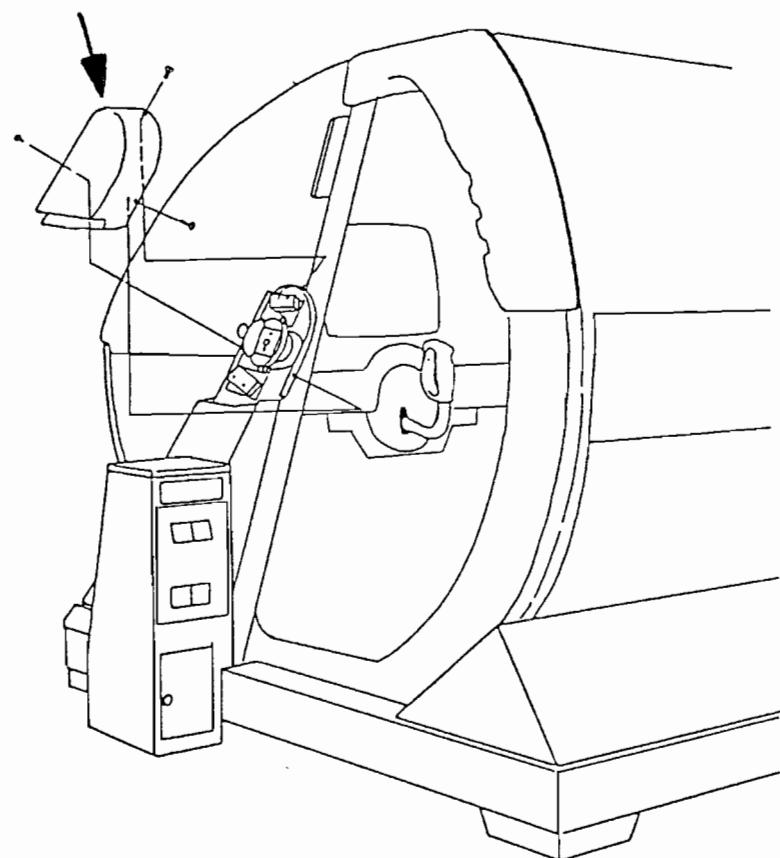

Push the trigger SW and while watching the screen, incline the handle grip to the left side. Check the RIGHT/LEFT VR value when the on-screen LIMIT SWITCH'S left-hand side "0" changes to "1", and make LEFT LIMIT SW adjustments until the above VR value becomes $40H(+2H)$. Similarly, incline the handle grip to the right side, check the RIGHT/LEFT VR value when the on-screen LIMIT SWITCH'S right-hand side "0" changes to "1", and make the RIGHT LIMIT SWITCH adjustments until the above VR value becomes $C0H(+2H)$.

17. PITCHING ADJUSTMENTS

Take off 3 tamperproof screws to remove the subpillar cover.

SUBPILLAR COVER

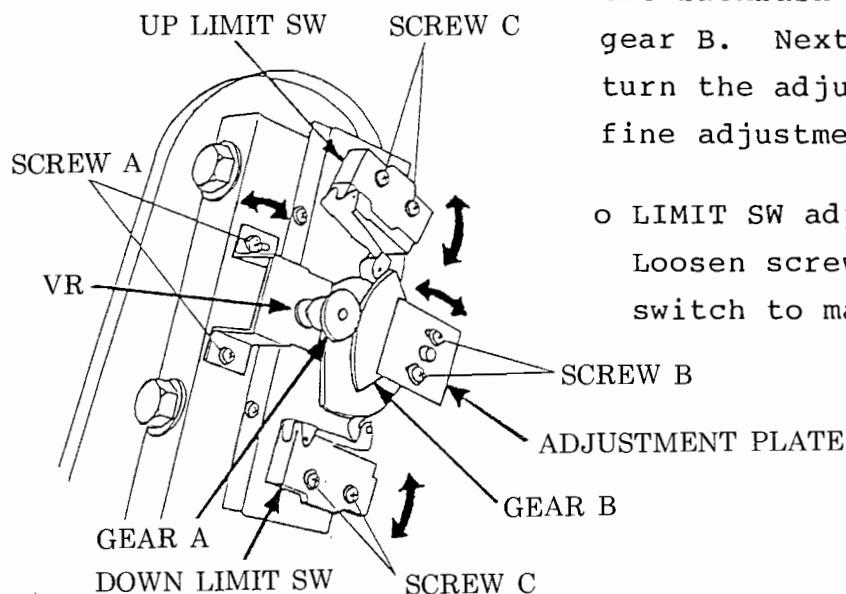

- * When adjusting the LIMIT SW and VR, first make VR adjustments (in order to properly set the LIMIT SW, the VR adjustments must be made correctly).

Similarly as in the rolling adjustments, select MOTOR TEST on the screen.

o VR ADJUSTMENTS

Press the handle grip's trigger SW and maintain the cabinet in a level position (make sure that the missile illustration on the side of the cabinet is parallel with the base). At this time, ascertain that the on-screen UP/DOWN value is $80H(\pm 2H)$.

First, loosen screw A and manually turn gear A to make adjustments of the backlash between gear A and gear B. Next, loosen screw B to turn the adjustment plate and make fine adjustments.

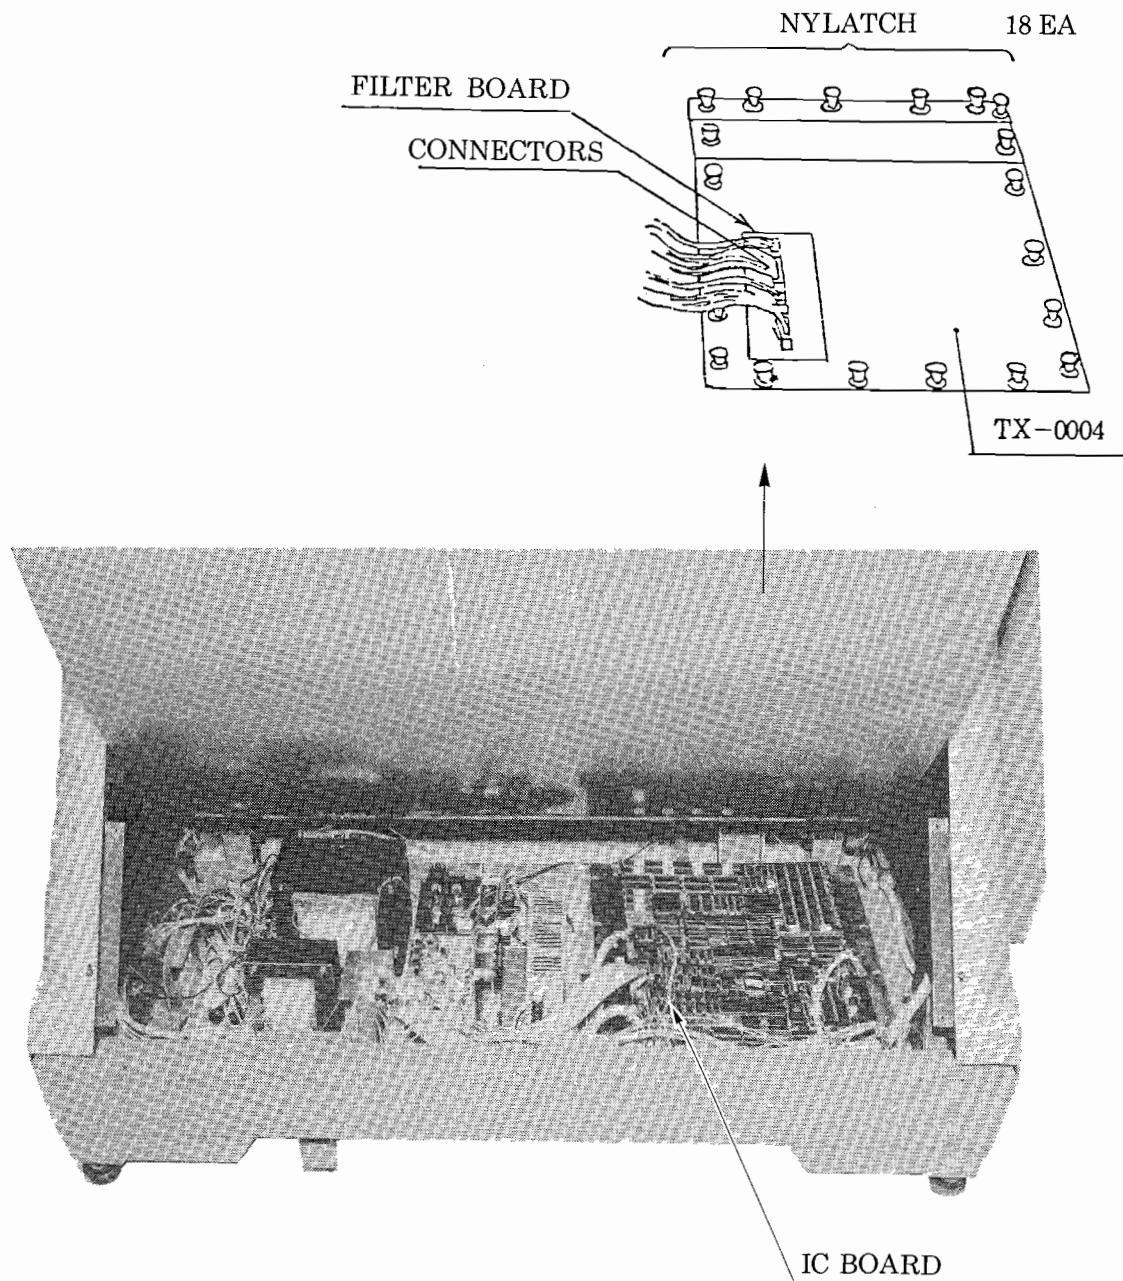

o LIMIT SW adjustments

Loosen screw C and move the limit switch to make adjustments.

Press the trigger switch and while watching the screen, pull the handle grip towards you (at this time, if the cradle does not go fully upward, then press the START SW and make MOTOR POWER LEVEL adjustments), check for the UP/DOWN VR value when the on-screen LIMIT SWITCH'S upper "0" value changes to "1" and make UP LIMIT SW adjustment so that the above VR value becomes $20H(\pm 2H)$. Similarly, push the handle grip upward and check the UP/DOWN VR value when the on-screen LIMIT SWITCH'S lower "0" value changes to "1", and make DOWN LIMIT SW adjustments in a manner so that the above VR value becomes $80H(\pm 2H)$.

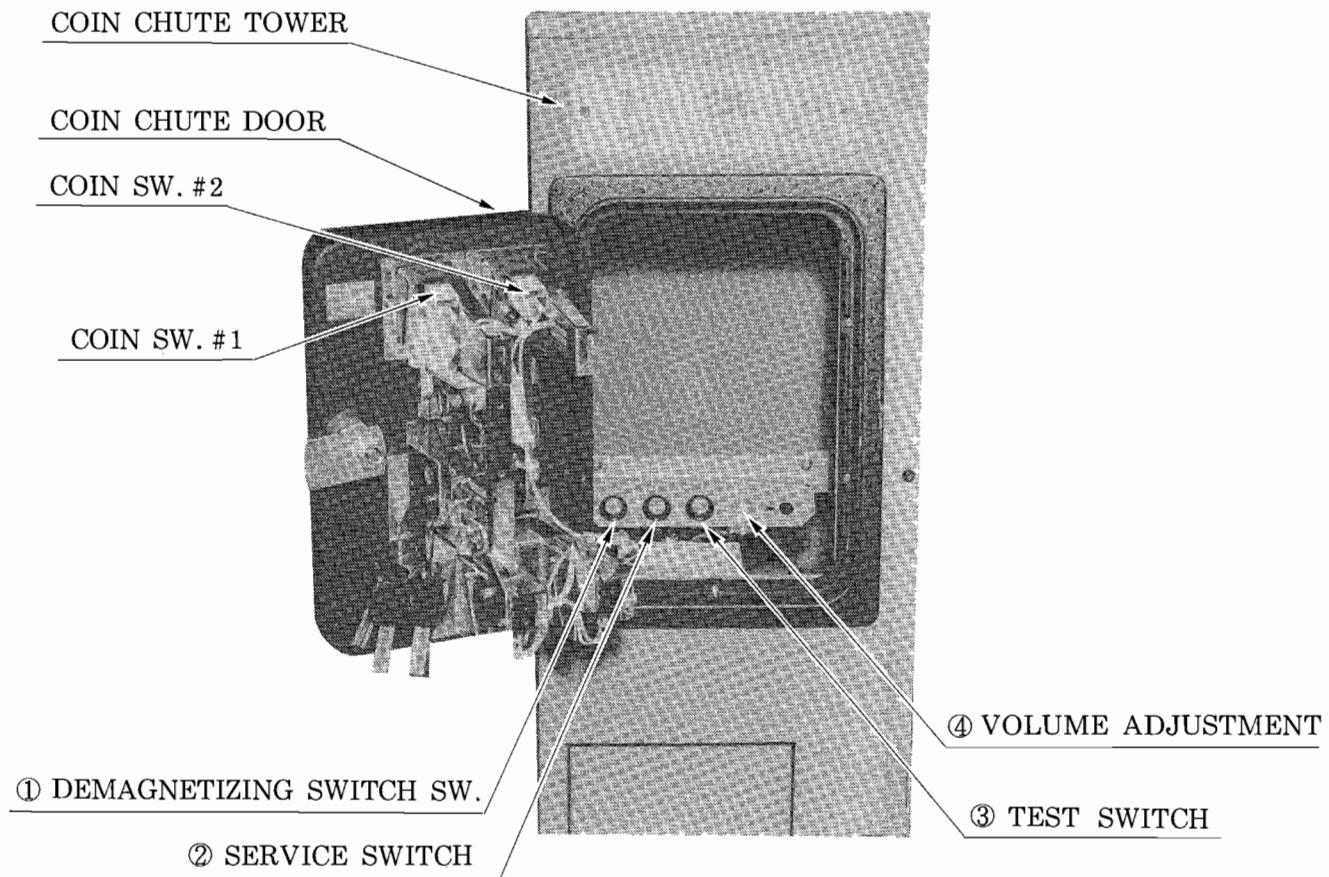

18. REMOVING THE IC BOARD

1. Disconnect all of the 5 filter board (839-0097) connectors.
2. Pull the "NYLATCH" knobs upward (18 points).
3. Lift up the shield cover (TX-0004) side which is towards you, disconnect connectors (AMPJ latch 50P, 20P, FLAT 26P, JST 6P x 2 and 4P) which are inserted in the IC board, and then remove the shield cover.
4. The IC board is secured to the base with 4 wood screws.
It can be removed by taking them off with a screwdriver.

19. SERVICE SWITCH FUNCTIONS

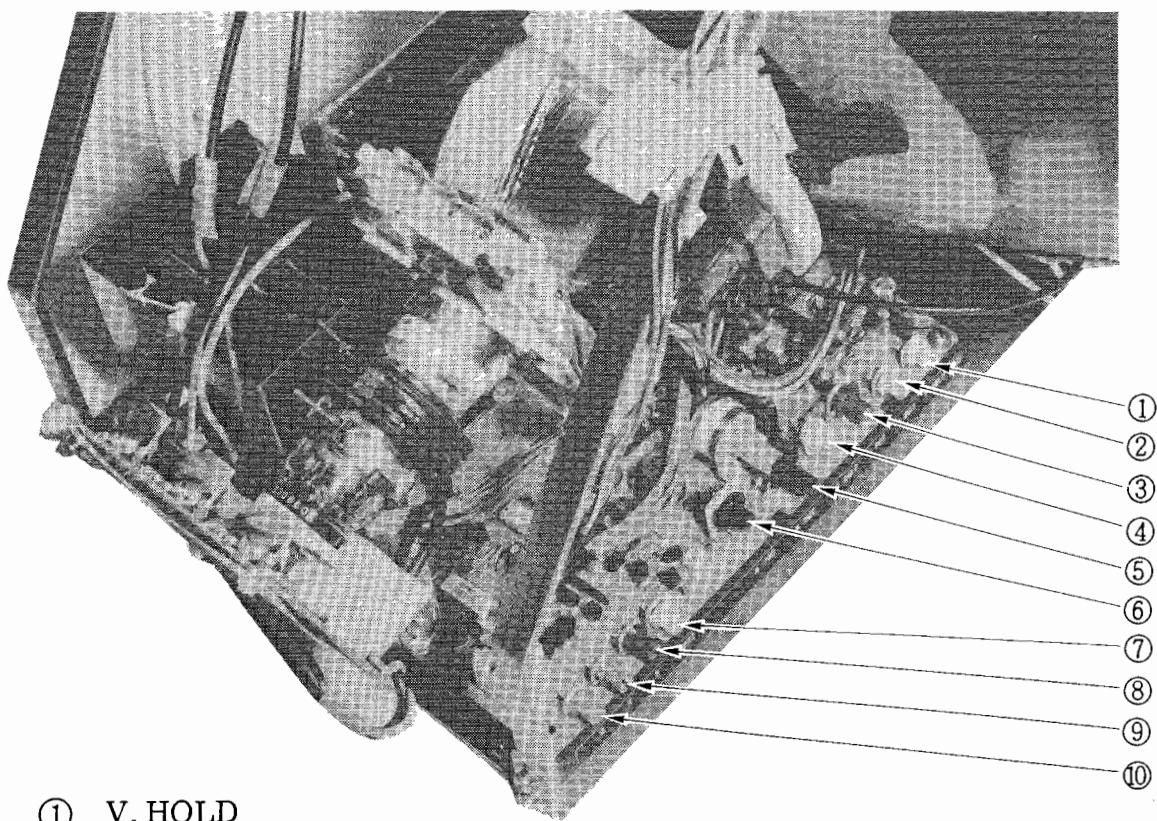

The layout as shown below can be viewed by opening the coin chute door.

INSTRUCTIONS

- ① DEMAGNETIZING SWITCH Used for removing the on-screen color unevenness.
- ② SERVICE SWITCH Used for the purpose of servicing and increasing the credits without registering on the meter (this allows you to check the game).
- ③ TEST SWITCH For operating this switch, see SELF-TESTING.
- ④ VOLUME ADJUSTMENT The volume of the speaker inside the cowl can be adjusted.

⑯ AC UNIT TX-3002 (D-1/2)

⑯ AC UNIT TX-3002 (D-2/2)

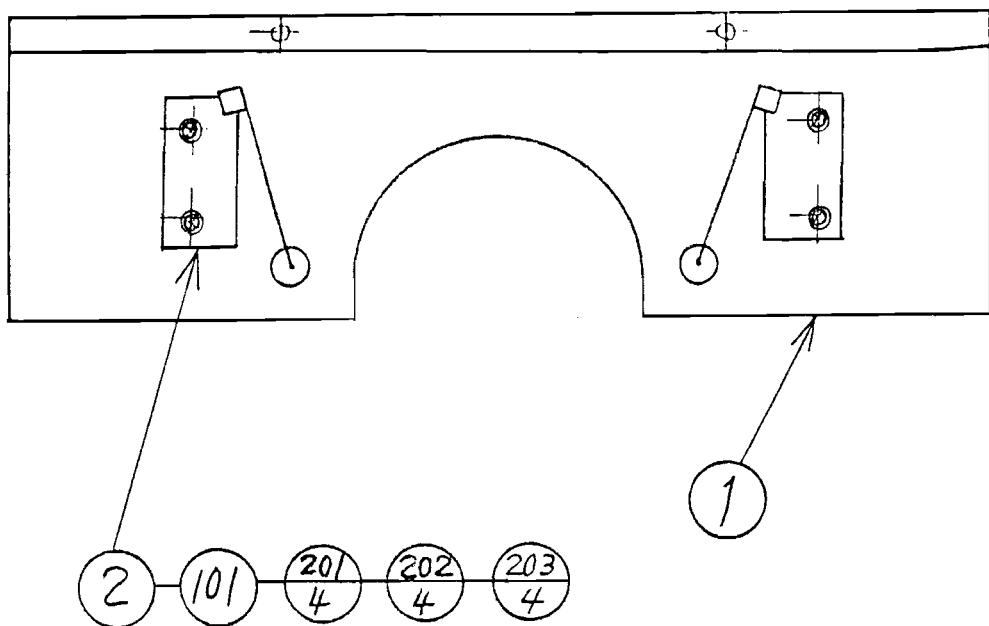

ITEM NO.	PART NO.	DESCRIPTION
1	TX-3003	AC BRACKET
2	421-6592	STICKER ON-OFF
3	421-6950	STICKER MAIN SW
101	509-5131	SW TOGGLE (ET-125A)
102	512-5010	CIRCUIT PROTECTOR NRF 110-8A
103	512-5003	CIRCUIT PROTECTOR 10A (200~240V AREA)
104	600-5577	CABLE & PLUG ASSY W/EARTH
	600-5007	CABLE & PLUG ASSY W/EARTH (240~240V AREA)
105	280-0418	BUSHING STRAIN RELIEF 7.6
106	509-0049	SW STOPPER Ø12
107	270-5009	LINE FILTER (ESD-R-47B)
108	270-5022	NOISE FILTER 20A
109	600-5513	WIRE HARN MOTOR PROTECTOR
110	601-5475	C & R COMB 120Ω+0.1M
111	152-0172	CAP FILM 0.47μ 250V
201	010-0408-F	S TITE RH W/F M4×8

⑩ OUTPUT UNIT TX-3004

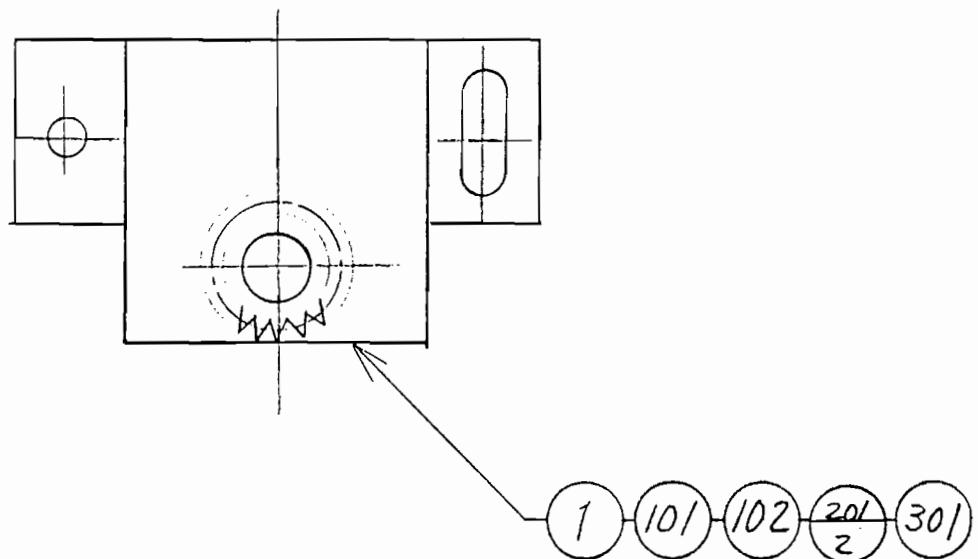

ITEM NO.	PART NO.	DESCRIPTION
1	TX-3005	OUTPUT BRACKET
2	421-6926	STICKER LINE OUT INSTR
101	210-5019	2P PHONO JACK
201	010-0306	S TITE SCR PH W/F M3×6

② ASSY LIMIT SW. P TX-3012

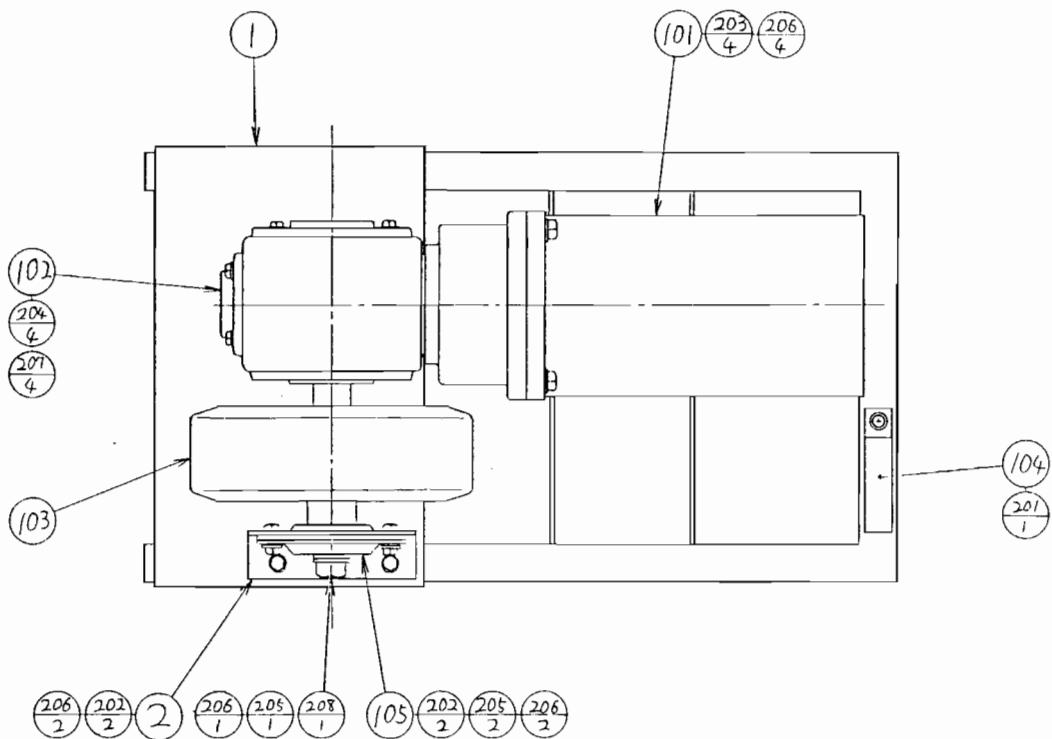

ITEM NO.	PART NO.	DESCRIPTION
1	KR-3013	LIMIT SW BRACKET S
2	KR-3023	LIMIT PLATE
101	509-5199	SW MICRO TYPE
201	000-0430	M SCR P.H M4×30
202	060-0004	FLT WSHR M4
203	061-0004	SPR WSHR M4

② ASSY VR P TX-3014

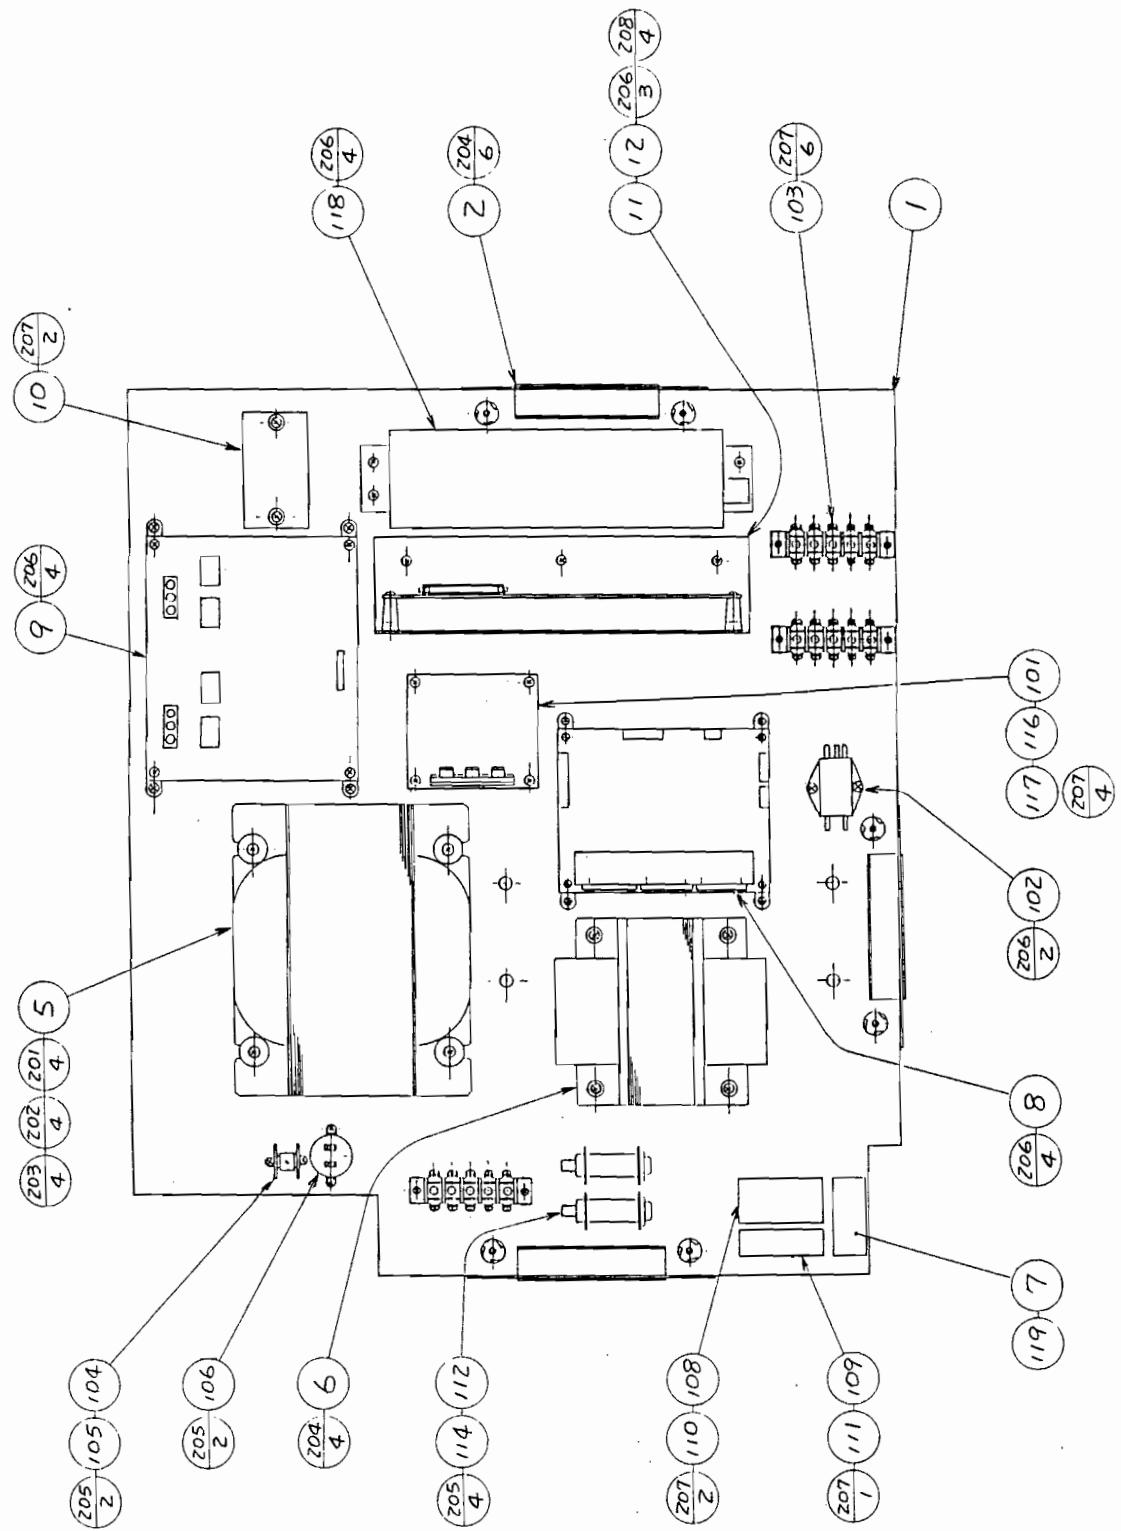

ITEM NO.	PART NO.	DESCRIPTION
1	TX-3015	VR BRACKET P
101	601-5424	GEAR 30
102	220-5130	VOL CONT B KOHM
201	028-0014	SET SCR HEX SKT CP UNBR M4×4

②3 MOTOR UNIT P TX-3018

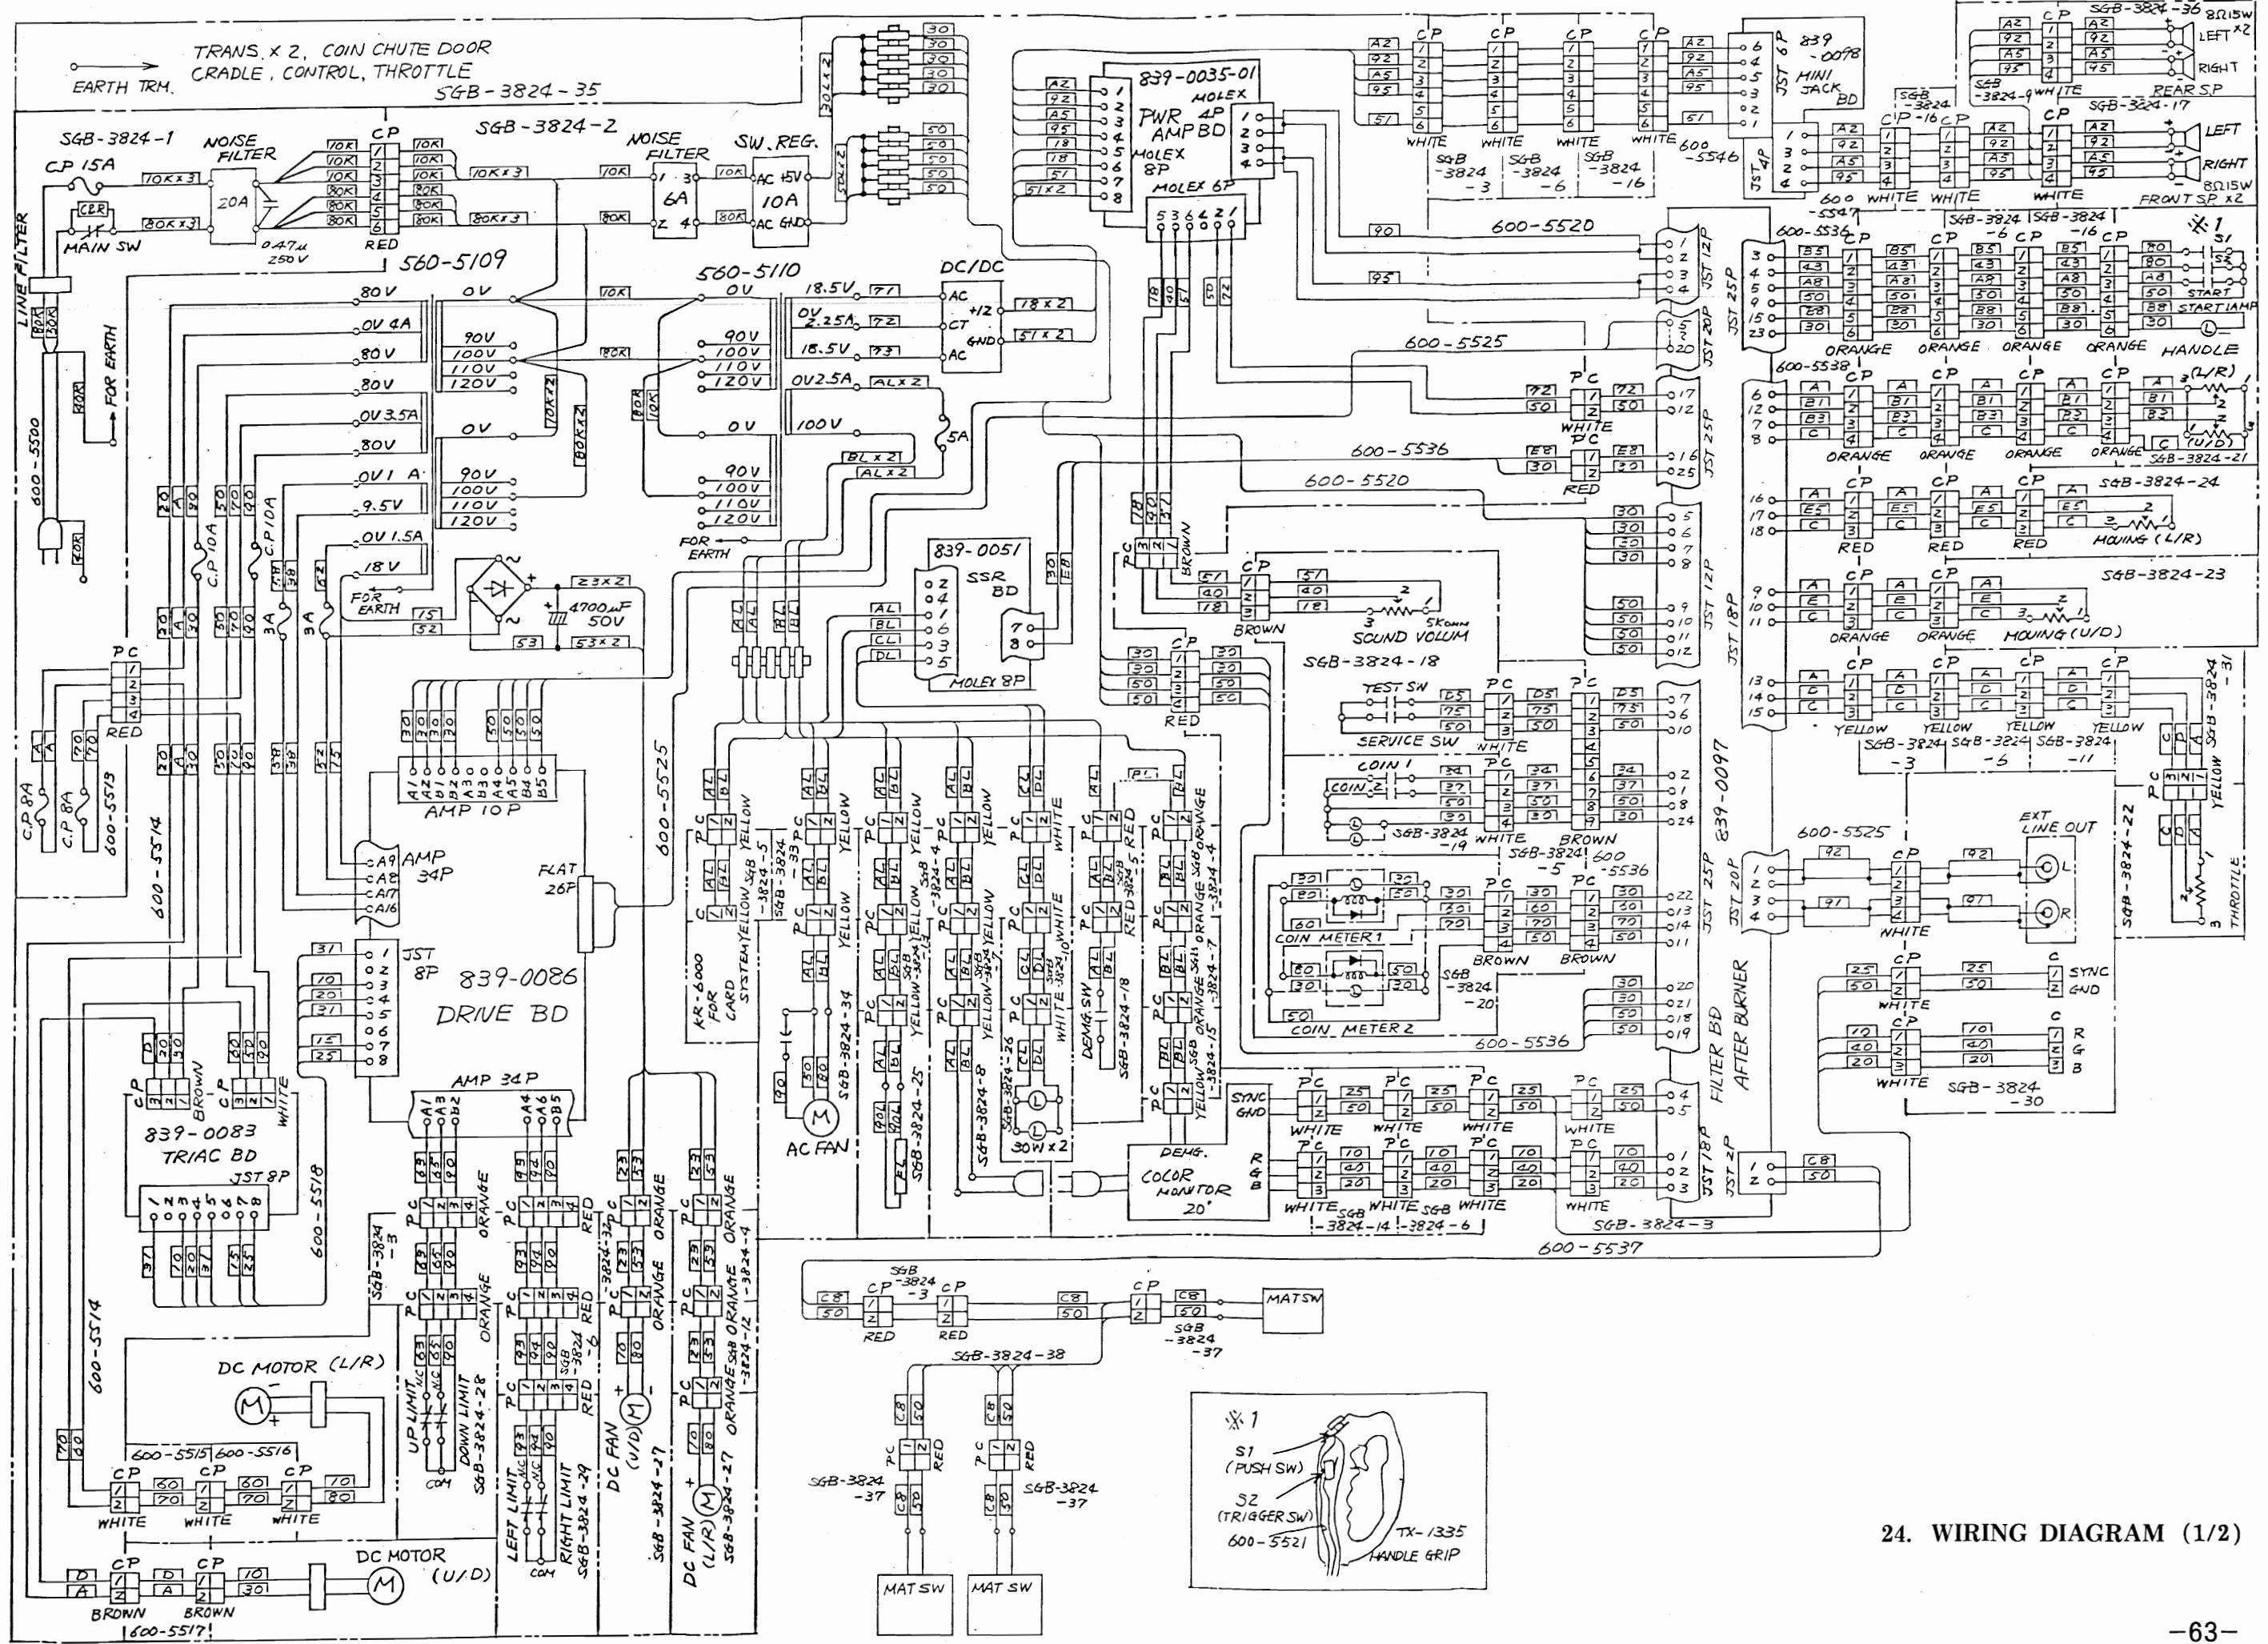

ITEM NO.	PART NO.	DESCRIPTION
1	TX-2032	MOTOR BASE
2	TX-2033	PILLOW BRACKET
101	350-5108	MOTOR DC 80V
102	350-5106	WORM SPEED REDUCER 1/60
103	601-5849	RUBBER WHEEL
104	270-5009	LINE FILTER
105	100-5045	BEARING $\phi 15$
201	010-0410-F	S TITE SCR P.H W/F M4×10
202	030-0620	HEX BLT M6×20
203	030-0625	HEX BLT M6×25
204	030-0820	HEX BLT M8×20
205	060-0006	FLT WSHR M6
206	061-0006	SPR WSHR M6
207	061-0008	SPR WSHR M8
208	030-0610	HEX BLT M6×10

24 ASSY PWR SPLY TX-4000 (D-1/2)

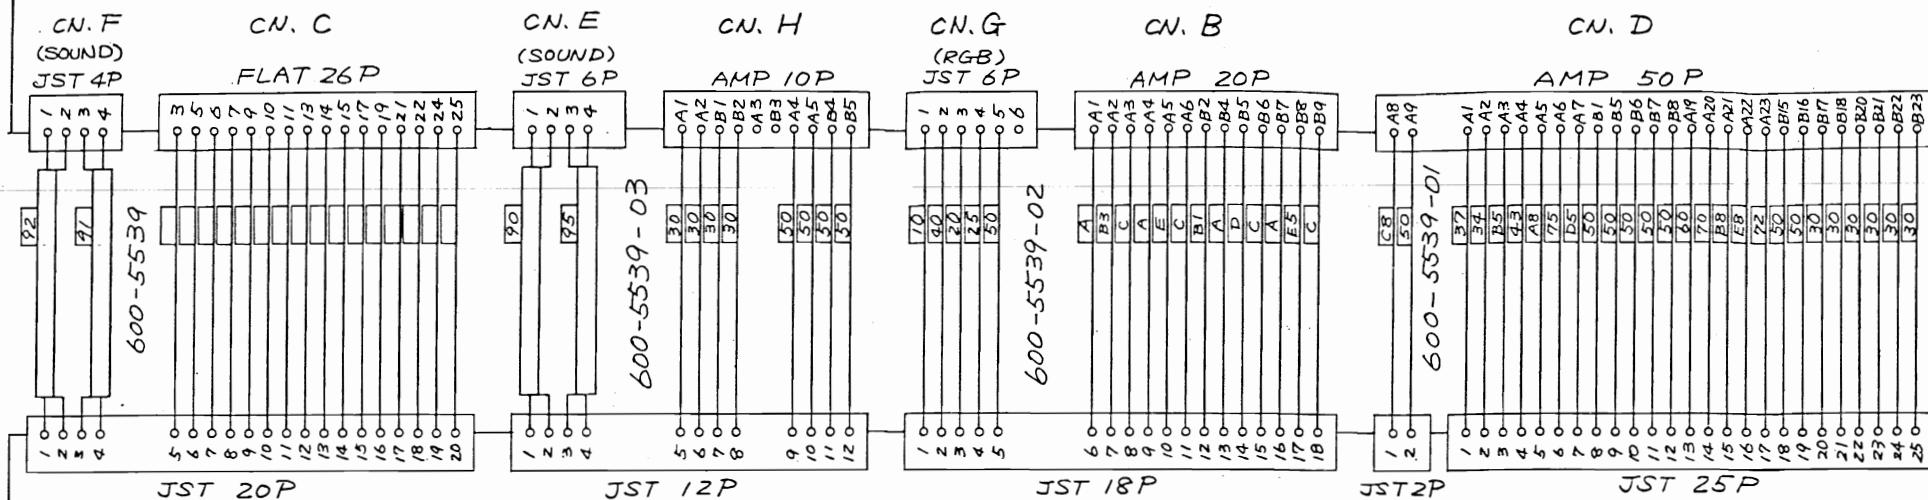

24 ASSY PWR SPLY TX-4000 (D-2/2)

ITEM NO.	PART NO.	DESCRIPTION	OPTION
1	TX-4001	BASE	
2	TX-4002	GRIP	
3	600-5514	WIRE HARN PWR SPLY	
5	560-5109	PWR XFMER 90~240V 80V×2	
6	560-5110	PWR XFMER 90~240V 100V 18.5V 9.5V	
7	421-6918	STICKER FUSE INSTR	
8	839-0035-01	PWR AMP DC 12V 10W
