# Remember that: If you clean them, they will earn!

A note from the STAR WARS - EPISODE I design team.

This game has been designed and built with maintenance in mind. All the devices are easy to get to, the playfield is easy to clean, and the software does all it can to detect faults and problems. Games that are clean and working WILL EARN MORE then dirty, broken games with no lights. It doesn't take long to clean the playfield and change bulbs if it is done weekly or every two weeks (according to how much play the machine gets). Check the Test Report (displayed as soon as the coin door is opened) and fix any problems that the game has detected. Pinball is a game of FUN, and people have the most fun on bright happy games that work.

Mr. Squeaky Mr. Ring Mr. Bulb Mr. Flipper

# **PINBALL GAME ASSEMBLY INSTRUCTIONS**

#### It takes two people to assemble a PINBALL 2000 game. Do not plug in or switch on power to the cabinet until assembly is complete!

Power:	Domestic 120V @ 60Hz	Dimensions:	Width: 24" approx.
	Foreign 230V @ 50Hz		Length: 48" approx.
	Japan 100V @ 50HZ		Height: 73" approx.
<u>Temp:</u>	32°F to 100° F, (0°C to 38°C)	Weight:	Backbox: 130 LB approx.
Humidity:	Not to exceed 95% relative.		Cabinet: 230 LB approx.

It is not necessary to open the computer case to assemble a PINBALL 2000 game. However, should you ever find it necessary to open the case, be sure to replace the computer case cover. Failure to do so will void FCC, UL and CE compliance, and may cause damage to the PC boards in the case. The foam lining of the cover holds the PC boards securely in place and protects them from vibrations that normally occur in a pinball game.

#### **REMOVE THE PLAYFIELD**

 To start removing the playfield from the cabinet, set the cabinet on a level surface. Unlock and open the coin door. Pull the yellow lever, (located on the left side of the coin door opening), to the right. The front molding pops up. Lift the molding from the cabinet. Slide the playfield glass down and lift it off of the cabinet. See Figure 1.

2. Lift the playfield by the support bracket under the front of the bottom arch. Rest the playfield on the top of the cabinet, nesting the plastic hex buttons in the trough of the bracket as shown in Figure 2A. Close the coin door.

3. Firmly grasp the playfield and slide it forward (toward you) along the bottom track slide brackets. Rotate the front of the playfield down and set it on the floor as shown in Figures 3 through 5.

- 4. Unplug the cables from the bracket on the back of the playfield and pull the playfield away. See Figure 5, above.
- 5. The leg levelers, nuts, and leg bolts are among the parts in the cash box. Install a leg leveler and nut on each of the front and rear legs. Place the cabinet on a support. Using two leg bolts in each leg attach the front and rear legs to the cabinet. Screw the levelers all the way into the legs. Remove the cabinet from the support. See Figure 6, below.

#### ATTACH THE BACKBOX

6. Cut the tie-wrap that holds the 9-pin serial cable, the 25-pin parallel cable and the power/speaker cable to the wood shipping brace. The shipping brace is held in place by two screws located on the left and right sides of the backbox. Remove the screws and shipping brace from the backbox and discard. See Figure 7, below.

7. Stand the backbox upright. Unlock, unscrew and remove the rear door. Pull the three cables out through the back door opening and let them hang down the rear of the backbox. See Figure 8. Among the parts in the cash box locate the four mounting bolts, washers and bushings, the 1/4" hex key and the 7/32" hex key. Set these parts aside.

FIGURE 8

8. WITH THE HELP OF ANOTHER PERSON, carefully lift the backbox and set it on the cabinet. See Figure 9.

**FIGURE 9** 

9. Line up the four mounting holes in the cabinet with the mounting holes in the backbox. In each of the four mounting holes, insert one bushing from the inside of the cabinet and one washer and bolt from the outside of the backbox. Use the 7/32" hex key in the bolt and the 1/4" hex key in the bushing and securely fasten the backbox to the cabinet. See Figure 10 below.

**FIGURE 10** 

**CAUTION** FAILURE TO INSTALL the backbox mounting hardware properly can cause personal injury.

#### PLUG IN THE CABLES

10. Do not force cables onto connectors, they should plug in easily. Plug the cables into the proper connectors on the Joining Bracket, which is located on the right side of the rectangular opening in the rear of the cabinet (see Figure 11). Secure the DB25 and DB09 cables in place using the thumbscrews.

Reach through the rectangular opening and pull the ground strap up. You may need to wrap the ground strap through the round hole to take up some slack. Remove the wing nut from the stud located to the left of the rectangle opening. Slip the ground strap ring terminal over the ring lug and secure it in place with the wing nut.

FIGURE 11

- 11. Replace and lock the backbox rear door. Replacing the screws is optional.
- 12. Lean the playfield against the cabinet front and plug the cables back into the rear bracket.
- 13. Carefully, lift the playfield from the front and tip the back of it onto the slides. Slide it back into the cabinet. Be sure that the cables at the back of the playfield are not kinked.
- 14. Rest the front of the playfield on the top of the cabinet as you did in Step 2. Open the coin door. Lower the playfield all the way into the cabinet.
- 15. Be sure the required number of balls is installed.
- 16. Replace the playfield glass. Be sure that the PINBALL 2000 logo is in the lower left corner. See Figure 12 below. Snap the front molding securely into place. Close and lock the coin door.

#### FIGURE 12

17. Plug the line cord into the game cabinet. Match the prongs on the plug with the holes in the receptacle, and push the line cord securely into place. See Figure 13.

#### LEVEL THE GAME

18. Move the game to the desired location. Screw the leg levelers all the way into the legs. If the floor is level, the cabinet is designed to position the playfield at exactly the recommended 6-1/2 degree angle. This places the game in a FIXED position. If the floor is not level, continue to adjust the levelers to compensate (see Step 18 below). On carpeting, the game must be allowed to settle overnight. Check the level and pitch again the next day. See Figure 14.

19. The level is located on the right shooter rail. The first line, (closest to the front of the game), on the level is approximately 6 degrees. Every line thereafter is approximately another 1/2 degree of pitch. The game is properly leveled when the NOSE of the bubble is between the first and second line on the level. See Figure 15.

#### **IMPORTANT!**

Playfield pitch angle can affect the operation of the plumb bob tilt. The plumb bob weight is among the parts in the cash box. After completion of the desired playfield pitch angle setting, the operator should install the weight and adjust this tilt mechanism for proper operation. The unit is factory installed for a 6-1/2 degree angle. If an adjustment is necessary, loosen the screw at the bottom of the unit. Move the pointer, one groove at a time to the left or the right, depending on the degree desired. Hold the pointer in place and tighten screw.

#### POWER UP

20. If a padlock is desired, install the security bar as shown below in Figure 16.

After assembly and installation at its site location, this game must be plugged into a properly grounded outlet to prevent shock hazard, and to assure proper game operation. DO NOT use a 'cheater' plug to defeat the ground pin. DO NOT cut off the ground pin.

- 21. With the coin door closed, plug the game into a properly grounded outlet and switch it on. In normal operation the game performs Start-up Tests. Once the Start-up tests have been successfully completed, the game enters the Attract mode.
- 22. IMPORTANT: Fill out and return the registration card.

#### **RAISING THE PLAYFIELD**

# 

This game uses playfield support assemblies to raise and lower the playfield. Be sure the back of the playfield supports slide along the cabinet tracks until the feet hook into the loop at the end of the track.

#### **Before Raising the Playfield:**

Be sure there are no balls present in any of the ball-holding playfield devices (i.e. poppers). Raising the playfield with balls present in these locations may cause them to come loose and damage the playfield. Use the "Empty Balls Test" to remove all of the balls from these locations.

#### To Raise the Playfield:

- Open the coin door. Remove the front molding and the playfield glass. Lift the playfield by the metal bracket under the front of the bottom arch. Rest it on the top of the cabinet, nesting the plastic hex button in the trough of the bracket.
- Close the coin door. Grasp the playfield by the supports and pull it toward you along the track slides until it stops. Rotate the front of the playfield up and back toward the backbox.

Be Sure the Feet of the Playfield Hook into the Loop on the Tracks.

#### To Lower the Playfield

- Rotate the front of the playfield down and push it back, away from you, along the track slides. Rest it on top of the cabinet. Open the coin door.
- 2. Grasp the playfield by the metal bracket under the front of the bottom arch and lower it back into the cabinet. Replace the playfield glass and the front molding. Close and lock the coin door.

#### **USING THE STAY ARM AND CHANGING FUSES**

# **CAUTION**

#### Before Raising the Playfield:

Be sure there are no balls present in any of the ball-holding playfield devices (i.e. poppers). Raising the playfield with balls present in these locations may cause them to come loose and damage the playfield. Use the "Empty Balls Test" to remove all of the balls from these locations.

#### To Use the Stay Arm:

- 1. Turn off power to the game. Open the coin door. Lift the front molding and slide the glass off of the cabinet. Lift the playfield by the metal bracket under the bottom arch. Rest it on the top of the cabinet.
- 2. Close the coin door. Lift the playfield high enough to enable you to unhook the rubber ring holding the stay arm down.
- 3. Slide the playfield forward until the feet lock into the notch on the slide.
- 4. Lift the stay arm and slide the round retainer into the 'U' shaped playfield holder bracket located on the right side of the playfield.
- 5. To release the stay arm, slightly raise the playfield and slide the retainer out of the playfield holder bracket.

**Note:** Be sure to support the playfield once the stay arm has been removed.

#### To Change a Fuse:

- 1. Turn off power to the game. Raise the playfield and hold it in place with the stay arm.
- 2. Lift the Power Driver board cover.
- 3. The fuses are accessible. Use the proper extraction tool to remove fuses.

### **GAME CONTROL LOCATIONS**

#### **Cabinet Switches**

The ON/OFF SWITCH is on the bottom of the cabinet on the middle of the right side. The START BUTTON is a push-button to the left of the coin door on the cabinet exterior. Press the Start button to begin a game, or during the diagnostic mode, to ask for HELP.

#### Service Lock

The service lock allows the operator to gain access to the playfield without allowing access to the cash box. With the coin door closed, turn the key in the service lock and the front molding pops up. Remove the molding and slide the glass down and off of the cabinet. The operator can clean the playfield or remove a trapped ball without being able to lift the playfield and gain access to the cash box.

#### **Coin Door Buttons**

The operator controls all game adjustments, obtains bookkeeping information, and diagnoses problems, using only four push-button switches mounted on the inside of the coin door. The coin door buttons have two modes of operation Normal Function and Test Function.

#### NORMAL FUNCTION

The SERVICE CREDITS button puts credits on the games that are not included in any of the game audits.

The VOLUME UP (+) button raises the sound level of the game. Press and hold the button until the desired level is reached.

The VOLUME DOWN (-) button lowers the sound level of the game. Press and hold the button until the desired level is reached. See the Adjustment menu to turn the sound down all the way.

The \*\*BEGIN TEST button starts the Menu System operation and changes the coin door buttons from Normal Function to Test Function.

#### **TEST FUNCTION**

The ESCAPE button allows you to get out of a menu selection or return to the Attract mode.

The UP (+) button allows you to cycle forward through the menu selections or adjustment choices. The DOWN (-) button allows you to cycle backward through the menu selections or adjustment choices.

The ENTER button allows you to get into a menu selection or lock in an adjustment choice.

The START BUTTON is not shown on this drawing. It is located below the service lock. \*The LEVER is part of the LOCK BRACKET ASSEMBLY.

\*\* To Reset the High Scores, press and hold the Begin Test button.

#### GAME OPERATION

## 

After assembly and installation at its location, this game must be plugged into a properly grounded outlet to prevent shock hazard, and to assure proper game operation. DO NOT use a 'cheater' plug to defeat the ground pin on the line cord. DO NOT cut off the ground pin.

**POWERING UP.** With the coin door closed, plug the game in, and switch it on. The game performs Startup Tests. A test pattern and 'PLEASE WAIT' appears on the screen. The screen changes and 'TESTING' appears on the screen. Once the Start-up tests have been successfully completed the game goes into the Attract mode.

**Note:** After the game has been on location for a time, the Start-up tests may contain messages concerning game problems.

- **ATTRACT MODE.** During the Attract mode, the screen shows a series of messages informing the player of the recent highest scores.
- CREDIT POSTING. Insert coin(s). The screen shows the number of credits purchased.
- **STARTING A GAME.** Press the Start button. A ball is ejected into the shooter lane. Pull the Ball Shooter on the cabinet to send the ball onto the playfield and begin game play. If credits are posted, additional players may enter the game by pressing the Start button once for each player, before the end of play on the first ball.
- **TILTS.** Actuating the cabinet slam tilt switch inside the cabinet ends the current game and proceeds to the Game-over mode. With the third closure of the plumb bob tilt switch, the player loses the remaining play of that ball, but can complete the game.
- **END OF A GAME.** All earned scores and bonuses are awarded. If a player's final score exceeds the specified value, the player receives a designated award for achieving the current highest score. A random digit set appears in the display. An award may be given when the last two digits of any player's score match the random digits.
- **GAME-OVER MODE.** The **Game-over** screen shows the high scores and the game proceeds to the Attract Mode.

#### SYSTEM MENU OPERATION

The System Menu allows you to choose from several menus, which in turn, lead to other menus to choose from. To access the System Menu, open the coin door and press the Enter button. The System Menu appears on the screen. Press either the Up or the Down buttons to move the cursor up or down the screen. Notice how the menu options are highlighted in order. A menu option must be highlighted for it to be selected. To open a System Menu item, (Diagnostics menu, Adjustments menu etc.), press the Enter button when that menu is highlighted. To return to the System Menu (from the Diagnostics menu, Adjustments menu, etc.) press the Escape button at any time. The following outline shows the System Menu and the next lower level of menus available from the System Menu.

#### ALL TESTS OK or READ TEST REPORT

If there are no known errors, this menu reads 'ALL TESTS OK'. However, if the system detects an error, 'READ TEST REPORT' shows on the screen.

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select Read Test Report. Press the Enter button to start the function. The phrase 'Testing Please Wait' appears as the game performs a self-test. The screen changes to show the test results. Press the Escape button to return to the System menu.

#### DIAGNOSTICS

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Diagnostic menu. Press the Enter button to open the menu. Once the Diagnostic menu is open, use the Up and Down buttons to move the cursor and select a test. Some tests, such as the Lamp test, lead to several sub-tests. In which case, use the Up and Down buttons to move the cursor and select a sub-test. Press the Enter button to begin the test.

Press the Escape button to return to the Diagnostic menu. Press the Escape button a second time to return to the System Menu.

In order to operate the tests that use the +50V or +20V circuits, pull the interlock switch button out. The interlock switch is located on a bracket in the coin door opening.

#### SWITCH TEST

Press each of the switches one at a time. The name and number of the switch is displayed, and the location in the matrix and on the playfield is lit up on the screen. If a switch other than the one pressed, or no switch at all is indicated, the system has detected a problem with the switch circuit. Press the Start button for additional options.

#### LAMP TESTS

The Lamp test leads to a menu of tests for the lamp circuits.

#### Single Lamp Test

The Single Lamp test checks each lamp circuit individually. Press the Up or Down buttons to scroll through this test. A lamp should light for each name and number that is displayed. Any other results indicate the system has detected a problem.

#### LAMP TESTS CONTINUED...

#### Lamp Row/Column Test

This test allows entire individual rows and columns in the lamp matrix to be operated.

Press the Up and Down buttons to cycles through the different rows and columns. The rows in Matrix A light first, followed by the columns. Next, the rows in Matrix B light followed by the columns.

#### All Lamps Test

This test causes all the controlled lamps to flash at the same time. Every controlled lamp should flash. Any other results indicate the system has detected a problem.

#### Lamp and Flasher Test

This test flashes all the controlled lamps and the solenoid flashers at the same time. Every bulb should light. Any other results indicate the system has detected a problem.

#### **Ordered Lamp Test**

This test lights each lamp in order. Every lamp should light in its turn. Any other results indicate the system has detected a problem.

#### SOLENOID TEST

The Solenoid test has three modes -- Repeat, Stop, and Run. Only one solenoid should pulse at a time. The system has detected a problem if more than one solenoid pulses, a solenoid comes on and stays on, or no solenoids pulse during the Repeat and Run modes.

#### Repeat

The Repeat mode activates an individual solenoid. Press the Enter button to start this test. The name of the first solenoid shows in the display and the corresponding coil pulses. Press the Up or Down buttons to cycle through the solenoids, one at a time. The same solenoid pulses until you press the Up or Down buttons to advance to the next or previous solenoid. To advance to the Stop mode, press the Enter button.

#### Stop

The Stop mode halts the Solenoid test. No solenoids should be active. To advance to the Run mode, press the Enter button.

#### Run

The Run mode loops through the solenoids automatically. The screen shows the name and number of the solenoid currently being pulsed. To return to the Repeat mode, press the Enter button.

#### **AUDIO TESTS**

The Audio Tests lead to a menu of tests for the audio circuits. Note that the only way to end an audio test is to use the Stop Audio Test feature.

#### Left Channel

This test causes music to be heard through the left side speakers.

#### **Center Channel**

This test causes music to be heard through the left and right speakers simultaneously.

#### **Right Channel**

This test causes music to be heard through the right side speakers.

#### **Test Knocker**

This test makes the knocker sound.

#### AUDIO TESTS CONTINUED...

#### Stop Audio Test

Selecting this item stops the music started from the above tests.

#### **VIDEO TESTS**

The Video Tests lead to a menu of tests for the video circuits.

#### **Color Bars**

The Color Bars test fills the screen with several shades of colors to help with red, green, and blue color level adjustments. Each color should appear sharp and clear.

#### **Convergence Grid**

The Convergence Grid test fills the screen with a series of lines and dots. The imagines should be clear and the dots should be round.

#### **RGB Tests**

The RGB tests fill the screen with red, green, or blue. Press the Up or Down buttons to change the colors.

#### Setup Tests

The Setup test allows for all aspects of the monitor picture adjustment at one time.

#### **Alignment Tests**

This test allows for picture object alignment.

#### **DEVICE TESTS**

The Device Tests lead to a menu of test for specific mechanisms on the playfield.

#### **Empty Balls**

This function kicks out all the balls loaded in troughs, lockups, poppers, and kick-outs until no balls remain in those locations.

As the trough kicks out balls, they will stack up in the shooter lane, which may require manual clearing in order to allow further balls to be kicked out.

#### **FUSE CHECK**

This test shows the status – good or blown – of the fuses on the Power Driver board. A layout of the fuses on the Power Driver board is displayed on the screen. The good fuses are shown in green, the blown fuses are shown in red.

#### **DIP SWITCH**

This test shows the current DIP switch setting, as well as the available DIP switch setting for various countries. Press the Up or Down buttons to cycle through the countries that have DIP switch settings available.

#### **CHECKSUM ROMS**

This test automatically checks the checksums for the ROMs. Press the Enter button and wait until all the ROMs have been checked.

Note: This can take a while to complete.

#### **ADJUSTMENTS**

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Adjustment menu. Press the Enter button to open the menu when it is selected. Once the Adjustment menu is open, use the Up and Down buttons to move the cursor and select a sub-menu. Press the Enter button to enable the sub-menu and view the next level of functions.

Use the Up and Down buttons to move the cursor and select a sub-menu function. Press the Enter button to enable that function. Use the Up and Down buttons to change the value. Press the Enter button to lock in the new value, or press the Escape button to retain the original value and return to the sub-menu. The setting values are color coded: Blue = Factory Setting; Red = Changed Value; Green (during adjustment) = Default Factory Setting

Press the Escape button to return to the sub-menu. Press the Escape button a second time to return to the Adjustment menu and a third time to return to the System Menu.

#### SYSTEM ADJUSTMENTS

#### **Power Saver**

The Power Saver feature helps to prolong the life of each lamp by reducing the power of all the lamps when the game is idle. This adjustment leads to sub-menus to choose from.

#### Lamp Power Saver

This adjusts the number of minutes of idle time (no game being played) before the Lamp Power Saver mode is enabled. Settings: Off, 1 to 60 minutes Factory Setting: 15

#### SYSTEM ADJUSTMENTS CONTINUED...

#### Power Saver Level

This adjusts the level of power savings when the Power Saver mode is enable (i.e. the game has been idle for the 'Lamp Power Saver' minutes). The higher the number, the dimmer the lamps will be when saving power. Settings: 5-25 Factory Setting: 10

#### Lamp Intensity Level

This adjusts the level of power saving when the Power Saver mode is not active. The lower the number, the brighter the lamp will be during game play. Settings: 0-15 Factory Setting: 5

#### **Balls Per Game**

A "game" is defined by specifying the number of balls to be played. Settings: 1 to 10 Factory Setting: 3

#### **Family Mode**

This eliminates any video or speech that may be offensive to young or sensitive players. Settings: Yes, No Factory Setting: No

#### Player-select Tournament

The player can activate tournament mode before the start of a game. Tournament mode will be activated only for one game. Settings: Yes, No Factory Setting: No

#### **Game Restart**

When you press the Start button during or after the 2nd ball, the game in progress ends and a new game begins. This adjustment determines how to handle this.

Settings: Never - Don't allow a new game start until the current game is over.

- Slow Restart if the Start button is pressed continuously for over 1/2 second. This helps to prevent the unintended restart of the game in progress.
- Instantly Restart as soon as the Start button is pressed. When you press the Start button during game over, or during the 1st ball (to add a player), it is always handled instantly.

Factory Setting: Slow

#### **Tournament Play**

Equalize random game features and global score values during multi-player games. Settings: Yes or No Factory Default: No

#### **Maximum Tickets per Player**

The number of tickets each player can earn. Settings: 00 to 100. Factory Default: 25

#### **Special Award**

The award a player receives when he/she earns a Special. Settings: Credit, Ticket, Extra Ball, Points Factory Setting: Credit

#### SYSTEM ADJUSTMENTS CONTINUED...

#### Slamtilt Penalty

Whether or not the player is penalized for causing a Slamtilt. Normally, Slamtilt only locks out coins for a short period of time. If this adjustment is set to yes, then a credit is removed, (if one is present). Settings: Yes or No

Factory Setting: No

#### **Tilt Warning**

The number of actuation's of the plumb bob that can occur before the game is "tilted". Settings: 1 to 10 Factory Setting: 1

#### **Allow Chase Ball**

The Chase Ball feature will attempt to keep a game operational in the event that a ball becomes stuck on the playfield. After a number of unsuccessful ball searches, the game software will end the player's current ball, give a bonus award, then serve a new ball (or end the game if that was the last ball in the player's game). This ball 'chases' the stuck ball on the playfield and will hopefully knock it loose. Setting this adjustment to NO will revert to the previous behavior of searching endlessly until the stuck ball becomes freed, or the machine's power is turned off and back on.

Settings: Yes or No Factory Setting: Yes

#### **Midas Enabled**

This enables the second serial port to work with the <u>Midas</u> Security Unit. Settings: Yes or No Factory Setting: No

#### FEATURE ADJUSTMENTS

#### Multiball Rematch Time (seconds)

This adjustment sets the time (in seconds) that the player can shoot for multiball rematch. Rematch is available after main multiball if the player did not score enough jackpots to have fun.

Settings: 10 to 30 seconds Factory Setting: 20 seconds

#### **Hits to Light Locks**

This adjustment sets the number of times the player must shoot the lock saucers (Watto's Junk Shop, or Mos Espa Market) to light lock for the first multiball. After each multiball is played, the number of hits to light lock is increased by 1, to a maximum of 3. Settings: 0 to 3 Factory Setting: 0

#### **Targets Help Start Scene**

The targets on either side of the shield count as hits on the shield while the player is trying to start a scene. This feature is only available until a certain number of scenes have been played. This adjustment sets the number of scenes that the targets will help start. If set to three, then the player can hit the targets to start the first three scenes only. Settings: 0 to 10 Factory Setting: 3

**Note:** If the shield opto is detected as being bad, the targets will ALWAYS help start the scenes, regardless of this adjustment.

#### FEATURE ADJUSTMENTS CONTINUED...

#### Destroyer Droid Scene Speed

This sets the speed that the roving gun moves during the Destroyer Droid scene. Settings: Fast, Medium, Slow Factory Setting: Medium

#### Hover Tank Scene Speed

This sets the speed that the roving catapult moves during the Hover Tank scene. Settings: Fast, Medium, Slow Factory Setting: Medium

#### **Musical Chairs Silence (seconds)**

This sets the time (in seconds) that the music is stopped during the musical chairs scene. Settings: 10 to 30 Factory Setting: 20

#### **Probe Droid Scene Speed**

This sets the speed that the roving gun moves during the Probe Droid scene. Settings: Fast, Medium, Slow Factory Setting: Medium

#### Side Targets Difficulty

This sets the difficulty of the side targets. Settings: Hard, Medium, Easy Factory Setting: Medium

Easy - Hitting any target adds a light.

Medium – Hitting a target turns that light on ONLY. If two lights are on, hitting any target will complete the bank.

Hard - Hitting a target turns that light on ONLY.

#### **Skill Shots for Awards**

This selects the number of skill shots that the players need until they get an award (JEDI letter). Settings: 0 to 10 Factory Setting: 3

#### C3P0 Game Start Spot

This sets the number of lights that are lit on C3P0 (the left loop) at the start of the game. Settings: 0 to 7 Factory Setting: 4

#### C3P0 Memory

This can disable the memory feature on C3P0 (the left loop) causing it to reset between each ball. Note that C3P0 will NEVER reset between balls until he has been completed at least once. Settings: Yes, No

Factory Setting: Yes (Do NOT reset between balls.)

#### Lasers at Game Start

This sets the number of lasers the player has at game start. Settings: 0 to 20 Factory Setting: 10

#### **Maximum Laser Count**

This sets the maximum number of lasers a player can have during a game. Settings: 30 to 70 Factory Setting: 50

#### FEATURE ADJUSTMENTS CONTINUED...

#### **GUNGAN Memory**

This can enable the memory feature on the GUNGAN spellout (in the jets) causing it to NOT reset between balls. Settings: Yes, No Factory Setting: No (Reset between balls.)

#### Attract Mode Sounds

When set to yes, the flipper and Start buttons will make sounds when pressed in the Attract mode. If this adjustment is set to no, then the buttons will never make sounds. Settings: Yes or No Factory Setting: Yes

**Note:** Even when set to yes, after a few presses, these buttons will make no sounds for about two minutes.

#### Attract Mode Music

When set to yes, this game will briefly play music periodically in the Attract mode. Settings: Yes or No Factory Setting: No

#### Neon Warm-up Time (minutes)

Some tubes have a gas that's an argon/mercury mixture. When it is turned on, the mercury gives off a lot of UV, which is transformed into visible light by the phosphorus coating on the inside of the tube.

If the tube is left off for a long time, the mercury cools; this means that when the tube is next turned on, there will be some dull spots, as the mercury is not giving as much UV.

**Note:** The dull spots do not affect the operation or safety of the neon tube or the game in any way. It is purely cosmetic.

This adjustment sets the time (in minutes) that the tube will be turned on in the Attract mode so that it stays warm and looking good. Settings: 0 to 120 minutes (2 hours) Factory Setting: 5 minutes

#### Neon Run Time (minutes)

Some tubes have a gas that's an argon/mercury mixture. When it is turned on, the mercury gives off a lot of UV, which is transformed into visible light by the phosphorus coating on the inside of the tube.

If the tube is left off for a long time, the mercury cools; this means that when the tube is next turned on, there will be some dull spots, as the mercury is not giving off as much UV. The tube will be turned on in the Attract mode so that it stays warm and looking good.

**Note:** The dull spots do not affect the operation or safety of the neon tube or the game in any way. It is purely cosmetic.

This adjustment sets the run time (in minutes). The run time is the time between warmups. During this time the neon tube will be cycled with the Attract mode lamp effects. Settings: 5 to 300 Factory Setting: 60 (1 hour)

#### FEATURE ADJUSTMENTS CONTINUED...

#### **Disable Left Drop Target**

This can be set to disable the left drop target device. If this is set to yes, the target will not be touched. The game will use the ramp enter opto to compensate for hits on the target.

Settings: Yes or No Factory Setting: No

#### **Disable Right Drop Target**

This can be set to disable the right drop target device. If this is set to yes, the target will not be touched. The game will use the ramp enter opto to compensate for hits on the target. Settings: Yes or No

Factory Setting: No

#### **Disable Magnet**

This can be set to disable the magnet device. If this is set to yes, the magnet will not be pulsed. Settings: Yes or No

Factory Setting: No

#### **Disable Shield**

This can be set to disable the shield device. If this is set to yes, the shield will not be touched. The game will use the shield targets to compensate for hits on the shield. Settings: Yes or No Factory Setting: No

**Note:** If the shield is disabled it will remain down, which means that no balls will reach the shield popper. This causes the game to report the popper opto as bad.

#### **GAME PRICING**

#### View Game Pricing

This adjustment allows you to view the current game pricing.

#### Select Game Pricing

This adjustment allows you to set the price a player pays for a game from a list of standard prices. Use the Up and Down buttons to move the cursor and select a country. Press the Enter button to view the available prices for that country. Use the Up and Down buttons to move the cursor and select a price and press the Enter button to lock in the new price.

#### **Advance Settings**

In the event that the price you wish to charge a player for a game is not available from the standard prices in the Select Game Pricing feature, the Advance Settings allows you to create custom pricing. This allows you to set the credits needed for a game.

#### **Currency Settings**

This adjustment allows you to set which currency the earnings are reported in. Use the Up and Down buttons to move the cursor and select a currency. Press the Enter button to lock in that currency.

#### **Pricing Editor**

In the event that the price you wish to charge a player for a game is not available from the standard prices in the Select Game Pricing feature, the Advance Settings allows you to create custom pricing. This allows you to set the credits needed for a game. This allows you to set the credits per coin.

#### GAME PRICING CONTINUED...

#### Edit Pricing Card Text

This allows you to change the text that is displayed as the pricing card.

#### **Free Play**

This adjustment determines whether or not the player can play the game for free. Settings: Yes or No Factory Setting: No

#### **Maximum Credits**

This is the maximum amount of credits that can be bought at one time. Settings: 5 to 99 Factory Setting: 10

#### Show, 'Insert Coins'

This adjustment can stop the game from displaying the 'Insert Coin' message in Attract Mode and during a game. Use this if the game is setup for a payment method Not available in the following adjustments. Settings: Yes, No Factory Setting: Yes

#### **Payment Method**

This selects the payment method used to get credits on the game. This will be displayed in the Attract Mode while the game is waiting for, or accepting credits. Settings: Coin, Token, Card, Bill Factory Setting: Coin

Coin – Attract Mode will display' Insert Coins' Token – Attract Mode will display' Insert Tokens' Card – Attract Mode will display 'Swipe Card' Bill – Attract Mode will display 'Insert Bill'

**Note:** If adjustments 'Show Insert Coin's' is set to No, then this adjustment will have NO effect, and no message will be displayed in the Attract mode.

#### **SCORE AWARDS**

This adjustment leads to a menu of adjustments for awards given at score levels. If an item shows up on the screen as dark blue, then it can be changed. If an item shows up on the screen as gray, then it cannot be changed.

Up to four (4) score award levels can be enabled. Each score award level can be set to award one of Extra Ball, Ticket, or Audit. The level two (2) award can additionally be set to award a Credit if the level one (1) award is set to award an Extra Ball. If the level two (2) award is set to Credit, then the Replay menu is enabled.

The score at which each level's award is given can be set to a score in the range of 1,000,000 (or the previous score level plus 500,000) to the next score level minus 500,000 (or 10,000,000,000). This is designed to enforce an increasing set of score awards levels.

#### Replay

This is a sub-menu of the 'Score Awards' adjustment menu. This menu is only available if the 'Score Levels' setting is 2 - 4, the 'Score Award 1' setting is 'EXTRA BALL', and the 'Score Award 2' setting is 'CREDIT'.

#### SCORE AWARDS CONTINUED...

#### Replay Mode

This setting controls the replay (CREDIT Score Award) mode of operation. Settings: Auto or Fixed Factory Setting: Auto

AUTO - This setting causes the effective 'Score Level 2' setting to be automatically adjusted based on the actual score levels achieved by players over time, in order to award a target percentage of CREDITS.

FIXED - This setting causes the actual 'Score Level 2' setting to be the score at which a CREDIT is awarded.

#### **Replay Percent**

If 'Replay Mode' is set to 'Auto', then this sets the target percentage of games that award a CREDIT. Settings: 1 to 50 Factory Setting: 5

#### **Replay Score**

If 'Replay Mode' is set to 'Auto', then this displays the current effective 'Score Level 2' score necessary for the player to be awarded a CREDIT. This adjustment is not settable.

#### **Replay Max. Bucket**

If 'Replay Mode' is set to 'Auto', then this setting controls the highest score considered by the automatic percentaging system in order to determine the 'Replay Score'.

#### **Replay Boost**

If 'Replay Mode' is set to 'Auto', then this displays the current score boost value used by the automatic percentaging system in order to determine the 'Replay Score'. This adjustment is not settable.

If 'Replay Mode' is set to 'Fixed', then this sets the value by which the 'Score Level 2' is increased in order to minimize the number of replays awarded to the same player.

#### **Score Levels**

This sets the total number of score award levels enabled. Settings: Off, 1 to 4 Factory Setting: 2

#### Score Level 1

This is the first score award level. If 'Score Levels' is set to 1 - 4, this is the score that the player must achieve in order to earn the 'Score Award 1' setting. Settings: 1,000,000 to 10,000,000 (or 'Score Level 2' minus 500,000)

Factory Setting: 50,000,000

#### Score Level 2

This is the second score award level. If 'Score Levels' is set to 2 - 4, this is the score that the player must achieve in order to earn the 'Score Award 2' setting.

Settings: 1,500,000 (or 'Score Level 1' plus 500,000) to 10,000,000,000 (or 'Score Level 3' minus 500,000)

Factory Setting: 200,000,000

#### SCORE AWARDS CONTINUED...

#### Score Level 3

This is the third score award level. If 'Score Levels' is set to 3 - 4, this is the score that the player must achieve in order to earn the 'Score Award 3' setting.

Settings: 2,000,000 (or 'Score Level 2' plus 500,000) to 10,000,000,000 (or 'Score Level 4' minus 500,000)

Factory Setting 500,000,000

#### Score Level 4

This is the last score award level. If 'Score Levels' is set to 4, this is the score that the player must achieve in order to earn the 'Score Award 4' setting. Settings: 2,500,000 (or 'Score Level 3' plus 500,000) to 10,000,000,000 Factory Setting: 700,000,000

#### Score Award 1

This is the first score award. If 'Score Levels' is set to 1 - 4, this is the award that the player will receive when the 'Score Level 1' score is achieved. Settings: Extra Ball, Ticket, Audit Factory Setting: Extra Ball

EXTRA BALL - an additional ball is added to this player's number of balls per game for this award.

TICKET - if a ticket dispenser is attached to the game, then a ticket will be dispensed for this award.

AUDIT - the 'Bookkeeping' audit 'Tickets Awarded' will be chalked for this award.

#### Score Award 2

This is the second score award. If 'Score Levels' is set to 2 - 4, this is the award that the player will receive when the 'Score Level 2' score is achieved. Settings: Credit, Extra Ball, Ticket, Audit Factory Setting: Extra Ball

Note that CREDIT is only available at this level and when 'Score Award 1' is set to 'EXTRA BALL', this setting awards a CREDIT (replay) for this award.

#### Score Award 3

This is the third score award. If 'Score Levels' is set to 3 - 4, this is the award that the player will receive when the 'Score Level 3' score is achieved. Settings: Extra Ball, Ticket, Audit Factory Setting: Extra Ball

#### Score Award 4

This is the last score award. If 'Score Levels' is set to 4, this is the award that the player will receive when the 'Score Level 4' score is achieved. Settings: Extra Ball, Ticket, Audit Factory Setting: Extra Ball

#### **EXTRA BALL**

This adjustment leads to a menu of adjustments relating to Extra Ball awards.

#### Maximum Extra Ball Count

This sets the total number of extra balls that a player can accumulate per game. Settings: 0 to 10 Factory Setting: 4

#### EXTRA BALL CONTINUED...

#### Maximum Extra B.I.P.

This sets the total number of extra balls that a player can accumulate per Ball in Play. If set to off, then no maximum is enforced. Setting: Off, 1 to 10 Factory Setting: Off

#### **Extra Ball Knock**

This controls whether the knocker is sounded when an extra ball is awarded. Settings: Yes, No Factory Setting: Yes

#### **Extra Ball Ticket**

This controls whether a ticket is awarded to the player earned an extra ball. Settings: Yes, No Factory Setting: No

#### MATCH

This adjustment lead to a menu of adjustments relating to the award of a credit (or ticket) at the end of each game, based on chance and settable target percentage.

#### **Match Feature**

This controls whether the Match feature is enabled (or not) and if enabled, the target percentage.

Settings: Off, 1 to 50 Factory Setting: 5

#### Match Award

This sets the award that the player will receive in the event of a match at the end of a game.

Settings: Credit, Ticket Factory Setting: Credit

#### **HIGH SCORES**

#### Jedi Battle Tables

This adjustment can totally disable the Jedi Battle tables. If this is set to No, then the player will not be asked to enter initials for playing the Jedi Multiballs, and the tables will NOT be displayed in the Attract Mode. Settings: Yes, No Factory Setting: Yes

#### **Jedi Battles Tables Award**

This selects the type of award that can be given when the player qualifies for one of the Jedi Battles tables. Settings: None, Credit, Ticket

Factory Setting: None

#### **Jedi Battle Table Credits**

This selects the number of awards (as set by the 'Jedi Battle Tables Award' adjustment) given out for qualifying for the Jedi Battle tables. Settings: 0 to 10 Factory Setting: 1

#### HIGH SCORES CONTINUED....

#### Ramp Combo Champion

This adjustment can totally disable the Ramp Combo Champion. If this is set to No, then the player will not be asked to enter initials for Ramp Combo Champion, and the champion will NOT be displayed in the Attract Mode. Settings: Yes, No Factory Setting: Yes

#### **Ramp Combo Champion Award**

This selects the type of award that can be given when the player qualifies for one of the Ramp Combo Champion. Settings: None, Credit, Ticket Factory Setting: None

#### **Ramp Combo Champion Credits**

This selects the number of awards (as set by the 'Ramp Combo Champion Award' adjustment) given out for qualifying for the Ramp Combo Champion. Settings: 0 to 10 Factory Setting: 1

Ramp Combo Champion Default This sets the default Ramp Combo Champion. Settings: 3 to 20 Factory Setting: 6

#### Multiple Initials/Players

This determines if a player has to enter initials multiple times for each High Score type earned. Settings: Yes or No

Factory Setting: No

#### **Highest Scores**

The game maintains a record of the four highest scores achieved to date. Settings: Yes or No Factory Setting: Yes

#### High Score Award

This is the award given for achieving the High Score. Settings: Credit or Ticket. Factory Setting: None

#### **Champion Credit**

The number of credits or tickets awarded for a Grand Champion Score. Settings: 0 to 10 Factory Setting: 1

#### H.S.T.D. 1 Credits

H.S.T.D. 2 Credits

#### H.S.T.D. 3 Credits

#### H.S.T.D. 4 Credits

The number of credits or tickets awarded whenever a player exceeds the four highest scores. Settings: 0 to 10 Factory Setting: 1

#### **HIGH SCORES CONTINUED...**

#### H.S.T.D. Reset Every

The number of games to be played before an automatic reset of the displayed Highest Score occurs. The operator selects the values provided at reset in the Back-up High Scores.

Settings: OFF (Never Reset), 200 to 20,000. Factory Setting: 2000 Games

#### **Default Champion**

#### BOOKKEEPING

#### Audits Cannot Be Set, They Can Only Be Cleared.

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Bookkeeping menu. Press the Enter button to open the menu when it is selected. Once the Bookkeeping menu is open, use the Up and Down buttons to move the cursor and select a sub-menu. Press the Enter button to enable the sub-menu and view the next level of functions.

Use the Up and Down buttons to move the cursor and select a sub-menu function. Press the Enter button to enable that function. Use the Up and Down buttons to reset the value to zero. Press the Enter button to lock in the zero value, or press the Escape button to retain the original value and return to the sub-menu.

Press the Escape button to return to the sub-menu. Press the Escape button a second time to return to the Bookkeeping menu and a third time to return to the System Menu.

#### UTILITIES

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Utilities menu. Press the Enter button to open the menu when it is selected. Once the Utilities menu is open, use the Up and Down buttons to move the cursor and select a function. Press the Enter button to enable the function.

Use the Up and Down buttons to change the function setting. Press the Enter button when the desired setting is displayed and a 'countdown' screen appears. Press the Enter button during the 'countdown' to lock in the new setting. Or, wait for the 'countdown' to complete and the new setting is locked in automatically. Press the Escape button, during the 'countdown' to retain the original setting and return to the Utilities Menu.

Press the Escape button to return to the Utilities menu. Press the Escape button a second time to return to the System Menu.

#### SYSTEM INFORMATION

The System Information utility displays game specifications. It cannot be cleared.

#### SHOW SHELL WINDOW

This is used to show the system terminal window. It is for diagnostic use.

**Reset Menu** 

#### SET CUSTOM MESSAGE

This allows the operator to install a message that the players can read during the Attract Mode.

#### **SET LOCATION I.D.**

This utility allows the operator to show the game's location on printouts. Press the Enter button to open the utility. Use the Up and Down buttons to move the cursor and select letters. Press the Enter button to lock in desired letters.

#### UPDATE GAME CODE (You will typically want to run the latest update).

Use this menu to enable or disable the update game code (stored in the PRISM board FLASH memory).

#### **Enable Updated Code**

If the update game code is enabled, the system will run the last version of update game code installed (REFERENCE SOFTWARE UPDATES IN NEW FEATURES OF PINBALL 2000).

#### **Disabled Updated Code**

If the update game code is disabled, the system will run the version of game code located in the original PRISM board ROMs.

#### WARNING TO THE OPERATOR.

In early releases of the Revenge from Mars game code ROMs, DO NOT perform the Disabled Updated Code. Doing so will cause your game to run in Free Only Mode and the UPDATE GAME CODE utility menu will not allow the updated game code to be enabled. If you accidentally disable the update game code, do one of the following:

1) Plug a keyboard into the keyboard port (located near the computer case in the backbox) or,

2) Plug a computer terminal into the COM 1 port (located near the coin door).

Then, at the command (%) prompt type the following:

% fupdate enable

to re-enable the Updated Game Code.

Note: This operation takes about 15 seconds to complete.

#### SET CLOCK

Press the Enter button to activate the clock. Use the Up and Down buttons to change the time, then press the Enter button to lock in the time.

#### **INSTALL PRESETS**

Press the Enter button to open the utility. Use the Up and Down buttons to move the cursor and select from the available Presets. When the desired Preset is selected, press the Enter button to lock it in. Press the Escape button, during the 'countdown' to retain the original setting and return to the Utilities Menu.

#### **RESET MENU**

#### **Clear Audits**

Press the Enter button to clear the all of the audits.

#### **Clear Coins**

Press the Enter button to clear the Earnings Audits.

#### **Clear Credits**

Press the Enter button to clear the game Credits.

#### **Clear Earnings Charts**

Press the Enter button to clear the Earning Charts.

#### **Reset High Scores**

Press the Enter button to clear the High Score to Date Table.

#### **Factory Adjustment**

Press the Enter button to restore the adjustments to factory settings.

#### **Factory Reset**

Press the Enter button to restore the adjustments to their factory setting, clear the Audits, Reset the High Score, and the Location I.D.

#### PRINTOUTS

Open the coin door, press the Enter button and the System Menu appears on the screen. Use the Up and Down buttons to move the cursor and select the Printouts menu. Press the Enter button to open the menu when it is selected. Once the Printouts menu is open, use the Up and Down buttons to move the cursor and select a function. Press the Enter button to enable the function.

Press the Escape button to return to the Printouts menu. Press the Escape button a second time to return to the System Menu.

## **ROUTINE MAINTENANCE INFORMATION**

#### • CLEANING

Good game action and extended playfield life are the results of regular playfield cleaning. During each collection stop, the playfield glass should be removed and thoroughly cleaned using only a non-abrasive sprayed liquid glass cleaner and a soft cloth. The playfield should be wiped off with a clean, lint-free cloth. The game steel balls should be cleaned and inspected for any chips, nicks, or pits. Replace any damaged balls to prevent playfield damage.

Regular, more extensive, playfield cleaning is recommended. However, avoid excessive use of water and caustic or abrasive cleaners because they tend to damage the playfield surface. Playfield wax (or any carnauba based wax), or polish may be used sparingly, to prevent a buildup on the playfield surface. Do not use cleaners containing petroleum distillates on any playfield plastics because they may dissolve the plastic material or damage the artwork.

#### • GLASS PARTS

Wear protective gloves and use both hands when carrying or moving parts made of glass. Glass pieces can fly eight feet (two meters) or more from the point of impact.

#### SERVICE INFORMATION

# Only trained personal should service the game. Always turn off power and unplug the game before attempting any service!

#### LUBRICATION

The main lubrication points of playfield mechanisms are the pivots. A medium viscosity oil (switch target grease) is satisfactory for these devices. Because of the functional design (arm-actuated via solenoid plunger operation), the pivot points of the Left and Right Slingshots require lubrication as a regular servicing procedure. Lubrication to ensure proper operation also applies to the target blades of the Drop Targets. MBI Instrument Grease, also known as Drop Target Switch Lubricant, with a Williams' part number of El165, is a recommended lubricant.

#### ♦ SWITCHES

**Standup Target and Slingshot Switches**. To ensure proper operation, switch contacts should be free of dust, dirt, contamination, and corrosion. Blade switch contacts are plated to resist corrosion. Cleaning blade switch contacts requires gentle closing of the contacts on a clean business card or piece of paper, and then pulling the paper about 2 inches, which should restore the clean contact surface. Adjust the switch contacts to a 1/16-inch gap.

**Flipper Switches.** End-of-Stroke switches are NORMALLY OPEN. The switch should close when the flipper is energized. Only low computer current is carried through these switches. DO NOT FILE or abrasively clean these switches! An E.O.S. switch failure does not harm the flipper. The game notifies the operator that the switch is out of adjustment in the test report, but continues to play.

**Rollover Switches.** Roll the ball over the switch and listen for an audible click. The click indicates the switch is good and adjusted properly. If you do not hear a click, the switch may be wearing out.

**Magnetic Reed Switches.** A magnetic reed switch must be tested using a ball. Enter the Switch test and roll a ball over the switch. The corresponding number should show on the screen. If it does not and the switch is located on the playfield, be sure it is secured against an insert with two rubber grommets. If the switch is on a ramp, it must be in a holder. The switch must be flush against whatever surface it is attached to; if it's not there may be inconsistencies in the way it operates.

#### • SERVICE MIRROR

The backglass doubles as a service mirror when the playfield glass has been removed from the cabinet. Place the backglass – shiny side up – under the monitor. The black plastic knobs hold it in place.

# FLUORESCENT PARTS If you drop a fluorescent tube or a CRT and it breaks, it will implode! Use care in handling.

Wear protective gloves and use both hands when carrying or moving parts made of glass. Fluorescent tubes and CRTs will usually implode if broken. Glass pieces can fly eight feet (two meters) or more from the point of impact.

Remove the backglass. Remove both plastic lamp locks. Grasp the bulb at each end and give it a quarter turn. Gently pull the bulb straight out to remove it from its socket. The starter also requires a quarter turn for removal. Do not force the bulb or starter during reinstallation. Clean the bulb to remove fingerprints and dust, then reinstall the backglass.

To remove the entire light fixture, remove the lamp locks and the bulb as described above. Disconnect the fluorescent light assembly connector from its power cable. Remove the screws that hold the assembly to the cabinet, then lift out the assembly.

#### HIGH VOLTAGE CONSIDERATIONS

CRTs and their power supplies can retain energy for long periods of time after the power has been turned off. This is especially true when a defective circuit prevents a normal discharge. Connect a very well insulated ground strap to the metal chassis. Slide the free end of the strap under the CRT anode cap until contact is made. Wait two minutes for charge recovery, then discharge the anode a second time.

#### RADIATION

The high voltages used in the Monitor Assembly are capable of generating X-rays under fault conditions. Do not substitute high voltage components or modify the circuit without factory authorization. Follow manufacturer's directions for measuring and adjusting the CRT anode voltage.

#### CIRCUIT PROTECTION

To avoid equipment damage, any replacement fuse must match the original in fuse type, voltage rating, and current rating. Do not use fuses with different time delay characteristics.

#### • MONITOR

Unlock and remove the backbox rear door. Disconnect all of the cables going to the monitor. Remove the four flange nuts securing the monitor's mounting brackets to its mounting panel. CAREFULLY, pull the monitor from the backbox. Clean the face of the monitor before reinstalling it.

# 

THE VIDEO MONITOR IS HEAVY, WITH MOST OF THE WEIGHT TOWARD THE FRONT OF THE ASSEMBLY. Be sure it is firmly supported as it is removed from the cabinet. The monitor does require isolation from the A.C. line voltage in normal operation. When operating outside the backbox or servicing the monitor on a test bench, YOU MUST ISOLATE THE MONITOR FROM LINE VOLTAGE WITH A TRANSFORMER. THE MONITOR MUST BE POWERED AT 120V.

#### ACCESSING THE COMPUTER CASE

Should you ever find it necessary to open the case, be sure to replace the computer case cover. Failure to do so will void FCC, UL and CE compliance, and may cause damage to the PC boards in the case. The foam lining of the cover holds the PC boards securely in place and protects them from vibrations that normally occur in a pinball game.

Side View of Backbox

Unlock and remove the backglass. Grasp the case from the front and slide it toward you. Let it hang down in front of the monitor. Slide the metal clip to the right and lift the cover off of the computer case. The PC boards are now accessible. Always replace the cover before reinstalling the case in the backbox.

#### REMOVING THE COMPUTER CASE

Unlock and remove the backglass. Grasp the case from the front and slide it toward you. Let it hang down in front of the monitor. Unplug the three cables on the left side and the one cable in the front of the case. Lift the rear of the case and pull it out of the backbox. Unplug the IEC cord from the rear of the computer case.

#### ♦ WATCHDOG-RESET CIRCUIT

Be sure the watchdog-reset cable is plugged into the proper location on the motherboard. The location of the reset connector depends on the manufacturer of the PC board.

#### POWER SUPPLY

# Be sure voltage switch is set to 115V (110V to 120V respectively) before installing the new power supply in the computer case, regardless of what country the game is in.

Unlock and remove the backglass. Grasp the case from the front and slide it toward you. Let it hang down in front of the monitor. Unplug the three cables on the left side and the one cable in the front of the case. Lift the rear of the case and pull it out of the backbox. Unplug the IEC cord from the rear of the computer case.

Remove the four outer screws surrounding the power supply that secure it to the case (see the diagram below). Slide the metal clip to the right and lift cover off of the computer case. Unplug the cable harnesses leading from the power supply; one plug is going to one connector on the power amp and two plugs are going to one connector on the motherboard. Lift the power supply out of the computer case.

Rear View of the Computer Case.

#### MEMORY

The ROM chips contain the computer operating instructions. Memory devices are very sensitive to static charges. Use grounding precautions when handling these parts.

To remove a ROM from its socket, carefully note its position and then lift it using a chip extraction tool. To reinstall a ROM place it over its socket so that the notch in the chip lines up with the silkscreen on the board, and press down firmly to seat. Do not force the ROM into the socket. Do not bend the pins under the ROM.

# 

Use wrist straps, conductive mats or other methods of safely discharging static electricity. Hold all chips by their packages and not by the metal pins. Extractor and insertion tools are recommended to avoid bent or broken pins caused by excessive force.

#### • BATTERY

Note the position of the battery. Gently lift the contact arm to release tension. Do not bend the arm. Slide the battery out of it holder. To reinstall the battery, orient the cell near the holder and slide it under the contact arm. Do not force the battery into the holder.

# 

Danger of explosion if battery is incorrectly replaced. Replace with only the same or equivalent type recommended by manufacturer. Do not attempt to recharge these batteries. Avoid direct shorts across terminals or from terminals to ground. Dispose of batteries according to manufacturer's instructions.

#### UPDATING THE GAME PROGRAM Using a Pub card

- 1. Turn off the game.
- 2. Remove the marquee.
- 3. Pull the computer case forward and let it hang down in front of the monitor.
- 4. Open the computer case.
- 5. Plug the card into the ISA socket. (See diagram below.)
- 6. Turn the game on. The updated program downloads automatically. This takes a few minutes.
- 7. When the process is complete, turn the game off and remove the card.
- 8. Close the computer case and slide it back in the backbox.
- 9. Replace the marquee.
- 10. Turn the game on. It is ready to play with the updated program installed.

#### Using a laptop computer

You need a serial 'null modem' cable, Internet access and of course a laptop computer.

- Go to web site <u>www.pinball.com</u>, then click on Technical Support. From Technical Support, click on Pinball 2000 Support, then scroll down to and click on Updating Pinball 2000 (under technical bulletins and tutorial). Read all of Updating Pinball 2000 BEFORE going any further.
- 2. Download the Update Manager to your laptop.
- 3. Download the game software update to your laptop.
- 4. Install the Update Manager. You will locate it in Windows Explorer. Once it is installed, a shortcut icon will appear on the desktop.
- Connect your laptop to the game. Use the 'null modem' cable and connect the serial port of the laptop to the serial port of the game. The game's serial port is located just inside the coin door on the same bracket as the interlock switch.
- 6. Run the update manager as shown in the tutorial. It takes about ten minutes to download the updated program into the game.
- 7. Once the download is complete, disconnect the cables, turn the game off and back on. You are ready to play.

### **EPILEPSY WARNING**

A very small portion of the population has a condition which may cause them to experience epileptic seizures or have momentary loss of consciousness when viewing certain kinds of flashing lights that are present in our daily environment. These persons may experience seizures while watching some kinds of television pictures or playing certain video games. People who have not had any previous seizures may nonetheless have an undetected epileptic condition.

If you or anyone in your family has experienced symptoms linked to an epileptic condition (e.g., seizures or loss of awareness), immediately consult your physician before using any video games.

We recommend that parents observe their children while they play video games. If you or your child experience the following symptoms: dizziness, altered vision, eye or muscle twitching, involuntary movements, loss of awareness, disorientation, or convulsions, DISCONTINUE USE IMMEDIATELY and consult your physician.

# NOTES

# **SECTION TWO**

**PARTS INFORMATION** 

Items listed as Associated Parts are not sold as part of the main assembly. Associated Parts are only sold separate.

# 50069-CAB **Cabinet Assembly Parts List**

1	Cadinel Asse	emply Parts List
<u>Item</u>	Part Number	Description
1	04-12753.2	Cabinet
2	01-11400-1	Leg Mounting Bracket (x4)
3	04-12869	Leg Assembly, Heavy- Black Ridge (x4)
4	08-7377	Leg Leveler/Adjuster (x4)
5	01-15132-1	Playfield Slide Track – Right
5		Stay Arm
	04-12610	
7	A-22996	Lockdown Bracket Assembly
8	A-23419	Speaker & Cable Assembly
9	A-22966	Power Control Box Assembly
10	04-12596.1	Drip Plate
11	5610-15930-01	Transformer Assembly
12	A-22998	Driver Board Cover Assembly
13	A-23299	Driver Board Back Plate Assembly
14	04-12329	Power Driver Board
15	03-10011	Cover Stop Tube
16	09-96032-33	Coin Door - USA - 2 Slot
17	20-10690	Hand Molding Lock
18	A-22984-1	Flipper Button Assembly (x2)
19	20-10696	Push Button w/Switch – START (Yellow)
		Ball Shooter Mounting Bracket
20	01-3535	
21	A-17730-1	Bail Shooter Assembly
22	A-23024	Coin Door Interlock Switch Assembly
23	A-22964	Coin door Interface PCB Assembly & Spacer
24	A-17195-2	Tilt Switch Assembly w/Cable
25	04-10346.1	Tilt Mechanism Assembly
26	20-6502-A	Plumb Bob
27	A-23139	4-Ball Cash Box Assembly
28	A-22997	Hand Molding Assembly
29	A-22976-1	Side Molding Assembly (x2)
30	04-12739.1	Tinted Playfield Glass Assembly
31	03-8091	Rear Molding
32	01-15214	Hole Cover
		Cabinet Corner Bracket
33	01-15212	
34	01-14085.1	Hasp Hinge Bracket
35	01-14086.1	Hasp Staple Bracket
36	20-10704-1	Slit Hose Sleeve - &1.25 x 60" Lg.
37	A-23421	Joined Cable Assembly

#### Notes....

Each Flipper Assembly is mounted beneath the playfield, in conjunction with the Plastic Flipper & Shaft, and Flipper Rubber on the upper side of the playfield.

1. With the flipper, in the non-activated position, the E.O.S. Switch contacts must have a gap of .062 (±.015) inch. When flipper is activated switch must close.

2. Any adjustment of the E.O.S. switch must be made at a minimum distance of 0.25 inch from the switch body.

3. Longer blade of E.O.S. switch must be made straight. Gap adjustment is done by adjusting shorter blade.

4. All moving elements of the assembly must operate freely without any evidence of binding.

Apply Loctite™ 245 when reattaching screws to the Flipper Stop Assembly, the Solenoid Bracket, and the Flipper Bushing.

## A-23001-L-3 Flipper Assembly

\*See A-23001-R-3, Flipper Assembly, for assembly detail drawing.

Note: Switch Assembly to be attached to the Switch Bracket using the outermost threaded holes on the bracket

<u>Item</u>

04-10346.1 Tilt Mechanism Assembly

**Notes:** \*Computer case power switch is supplied with item 7, Power Supply.

\*\*To update Prism Board software, use Prism Update Board (PUB), part number 04-12863 (supplied Separately).

A-22966 Power Control Box Assembly

<u>ltem</u>	Part Number	Description	ltem	Part Number	Description

### Wiring Diagram for the Ball Trough Assembly Opto Switches

This diagram shows the opto switches in the Ball Trough Assembly only. See the next page for the individual playfield opto switches.

#### The Ball Trough Assembly opto switches are:

Switch #41	Trough Eject
Switch #42	Trough Ball 1
Switch #43	Trough Ball 2
Switch #44	Trough Ball 3
Switch #45	Trough Ball 4

The Ball Trough Assembly opto switches use a green Ball Trough LED board (P/N A-18617-1), and a blue Ball Trough Photo Transistor board (P/N A-18618-1).

#### **OPTO SWITCH OPERATION:**

The ball rolls between the Ball Trough LED board and the Ball Trough Photo Transistor board and breaks the beam. The broken beam 'makes' the switch.

#### Wiring Diagram for Individual Playfield Opto Switches

This diagram shows the wiring for individual playfield opto switches only (except #41, Shield Hit switch). See the previous page for the Ball Trough Assembly opto switches wiring diagram and page 3-23 for the Shield Hit opto switch wiring diagram.

#### The individual playfield opto switches are:

Switch #46 Left Ramp Enter

- Switch #47 Right Ramp Enter
- Switch #51 Shield Popper 1

Each of these switches uses a green Individual LED board (P/N A-16908), and a blue Individual Photo Transistor board (P/N A-16909).

#### **OPTO SWITCH OPERATION:**

The ball rolls between the Individual LED board and the Individual Photo Transistor board and breaks the beam. The broken beam 'makes' the switch.

#### Wiring Diagram for 24 Opto Switch - #41 Shield Hit

This diagram shows the wiring for switch #41 Shield Hit. See page 3-20 for the wiring diagram for the Ball Trough Assembly opto switches and page 3-21 for the individual opto switches wiring diagram.

This switch uses a green Individual LED board (P/N A-16908), and a blue Individual Photo Transistor board (P/N A-16909).

#### **OPTO SWITCH OPERATION:**

The ball rolls between the Individual LED board and the Individual Photo Transistor board and breaks the beam. The broken beam 'makes' the switch.

#### WARNINGS & NOTICES

#### WARNING

FOR SAFETY AND RELIABILITY, substitute parts and equipment modifications are not recommended. Use of Non-WILLIAMS parts or modifications of game circuitry, may adversely affect game play, or may cause injuries.

SUBSTITUTE PART OR EQUIPMENT MODIFICATIONS may void FCC/CANADA Type Acceptance.

**BECAUSE THIS GAME IS PROTECTED** by Federal copyright, trademark, and patent laws, unauthorized game conversions may be illegal under Federal law.

THIS 'CONVERSION' PRINCIPLE ALSO APPLIES to unauthorized facsimiles of WILLIAMS equipment, logos, designs, publications, assemblies, and games (or game features not deemed to be public domain), whether manufactured with WILLIAMS components or not.

#### NOTICE

WILLIAMS, Lane-change and Multi-ball are trademarks of WILLIAMS ELECTRONICS GAMES, INC. Entire contents of this manual © 1999 WILLIAMS ELECTRONICS GAMES, INC.

#### WARNING

**NOTE:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generated, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations. Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

#### **RF Interference Notice**

CABLE HARNESS PLACEMENTS and ground strap routing on this game have been designed to keep RF radiation and conduction within levels accepted by the FCC Rules.

TO MAINTAIN THESE LEVELS, reposition harnesses and reconnect ground straps to their original placements, if they become disconnected during maintenance.

FCC/CANADA STICKER. Check the back of your game to verify that an FCC/CANADA certification sticker was attached to your game at the factory. All games that leave the WILLIAMS plant have been tested and found to comply with FCC/CANADA Rules. Because the sticker is proof of this fact, legal repercussions to the owner and distributor may result, if the sticker is missing. If you receive a game that has no FCC/CANADA sticker, call WILLIAMS for advice or write us a note on your Game Registration Card. Be sure that the card bears your game's serial number.
