# ASTEROIDS<sup>TM</sup> DELUXE

### THE HOT ONE'S EVEN HOTTER!

ATARI® ASTEROIDS DELUXE is the new generation of ASTEROIDS<sup>TM</sup>. It's the new ATARI video game that blasts the Asteroids profit revolution into hyperspace! With new action features designed to keep your earnings hot and offer your players fantastic challenge and excitement. Here are the features that make the difference:

**1. New "Shield" Control.** Provides temporary forcefield around player's ship to protect against enemy saucer fire and asteroid collision. The shield will eventually disintegrate with prolonged use so must be used sparingly. Shields are re-energized at full strength for each new spacecraft "life".

**2. New "Smart" Saucers.** Both large and small "enemy" saucers shoot at player's ship, rocks and "Killer Satellite". The larger saucer fires 3 out of 4 shots at asteroids, the 4th at the player. The small saucer fires 2 out of 3 shots at the player, the 3rd at asteroids.

**3. New "Killer Satellite".** A new "death-star" type Killer Satellite target veers onto the playfield during the second and each succeeding onslaught of asteroids. A hit on the Satellite explodes it into 3 smaller crafts, then into 6 even smaller missiles. Each segment also chases the player's ship.

## FACT SHEET

**4. New Three Dimensional Realism.** Atari's unique QuadraScan™ video graphics are superimposed, over a full color painting of an asteroids stream. Blacklight illumination with raised cutout rocks and spacecraft provides a realistic illusion of dimensional space.

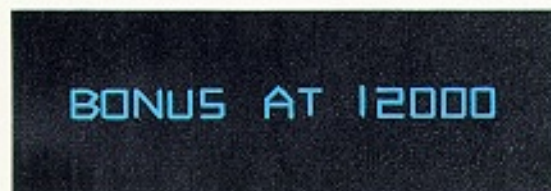

**5. "Tumbling" Asteroids.** Asteroids are more animated, move faster to add further realism and challenges. Rocks rotate as they "fall" across the video screen.

**6. Six Digit Score Counter.** New six digit score counter allows recording and display of scores up to 999,990 points.

**7. High Score Table with new Non-Volatile Memory.** The 10 best scores can be displayed along with corresponding players' initials. The new non-volatile memory feature retains the top 3 scores even if power is off.

**8. Four Operator Adjustable Bonus Levels.** New bonus "lives" can be awarded to 10,000, 12,000 or 15,000 point levels, or no bonus. 10,000 points are recommended for average players, 12,000 for intermediate skill and 15,000 for advanced skill.
