COSMIC SERIES

SPACE PANIC

Operation, Maintenance
and Service Manual

UNIVERSAL

Thank you very much for your purchase of the SPACE PANIC. Carrying a CPU, the SPACE PANIC is a game machine of the newest type with many features and functions.

This manual describes how to make the most of such features and functions, so please read it carefully in order to make the best use of the machine.

CONTENTS

I. Features of this machine	1
II. How to handle and maintain this machine	2
III. How to play	3
IV. Various optional settings	4
A. Positions of dip switches	4
B. Setting the option (dip switches)	4
C. Volume controller knob	5
V. TV monitor	5
A. Adjustment of TV picture screen	5
VI. Upright type parts catalog	6
A. Component parts related to cabinet (outside)	6
B. Drawing of circuit board mounting positions	7
C. Fuses	7
D. Component parts related to cabinet (inside)	8
a) Operating panel assembly	8
b) Door assembly and parts list	9
c) Lever assembly and part list	10
E. Component parts related to switches and lamps in the cabinet	11
VII. Circuit board	12
A. Circuit board IC location and parts list	12
a) Main circuit board IC location and parts list	12
b) Sound circuit board IC location and parts list	14
c) Sound sub-circuit board IC location and parts list	15
Wiring diagram (connector)	16
Postface	17
Sound block diagram	18
Power source block diagram	18
Block diagram	18
Schematic diagram (20" color)	19
Main block diagram	20, 21

— WHEN ORDERING PARTS —

Since each component part is indicated by block, definitely specify both the corresponding Fig. No. and part No. within the Fig. when placing an order for it.

I. FEATURES OF THIS MACHINE

1. The game packs in excellent features capturing the hearts of players.
2. The lever control system is simple to handle.
3. At the flick of a dip switch, you can select among extended play, the number of tanks and time of appearance of an additional tank, etc.
4. High score for the day is always displayed on the screen.
5. Finely designed cabinet and fascinating acoustic effects.

II. HOW TO HANDLE AND MAINTAIN THIS MACHINE

1. Since the UNIVERSAL's SPACE PANIC employs a color TV receiving set, be careful not to shake it during transit and when carrying it about.
2. Install it at a location which is not exposed to direct sunlight. In order to prevent the inside temperature rising, avoid as much as possible a location near a heater, etc.
3. Since the grounding terminal is visible, be sure to connect it to a grounding conductor.
4. Insert the power cord into the outlet and turn on the switch.
5. Even if the solid-state module seems to be out of order, do not check the circuit by means of a circuit tester, etc., since the internal voltage of the tester, etc. may sometimes break down the IC.
6. Make sure the machine is well ventiated. If the temperature of the IC and transistor is lower than 60°C, the function normally and may be considered reliable. If it exceeds 60°C, their performance cannot be guaranteed.
7. Make sure that the connector, etc. is not disconnected.
8. Whenever connecting the power cord of the solid-state module to, or disconnecting it from, the outlet, be sure to turn the power off.
9. Although the products of UNIVERSAL are manufactured with the utmost care, they may develop malfunctions when used for long periods. So, be sure to chek this machine daily.

III. HOW TO PLAY

1. Make the man dig holes! When a space monster has fallen through a hole to a lower floor, if you cover it over before the monster creeps out of it, you are awarded points.
2. A monster, boss, or don does not die unless they drop more than 1, 2 or 3 floors, respectively. Additionally, when more than 2 space monsters drop into the holes, or when a boss or a don is dropped onto a monster below, they die together. The larger the number of floors a monster drops, the higher the score awarded.
3. The man can move quickly down to a lower floor through the hole he has dug, and he can lure the monsters down through the hole to the lower floor.
4. When the man has been bitten by a monster or when all the oxygen has been used up, the man dies. When the oxygen display becomes "0", the man's face reddens, and the warning buzzer activates.
5. If oxygen has not been reduced to zero when the screen has been cleared, you are awarded bonus points corresponding to the amount of remaining oxygen.
6. The highest scorer can register his name on the screen.
 - Push the hole-digging button for each alphabetical letter you want to register.

SCORE

MONSTER

100~800

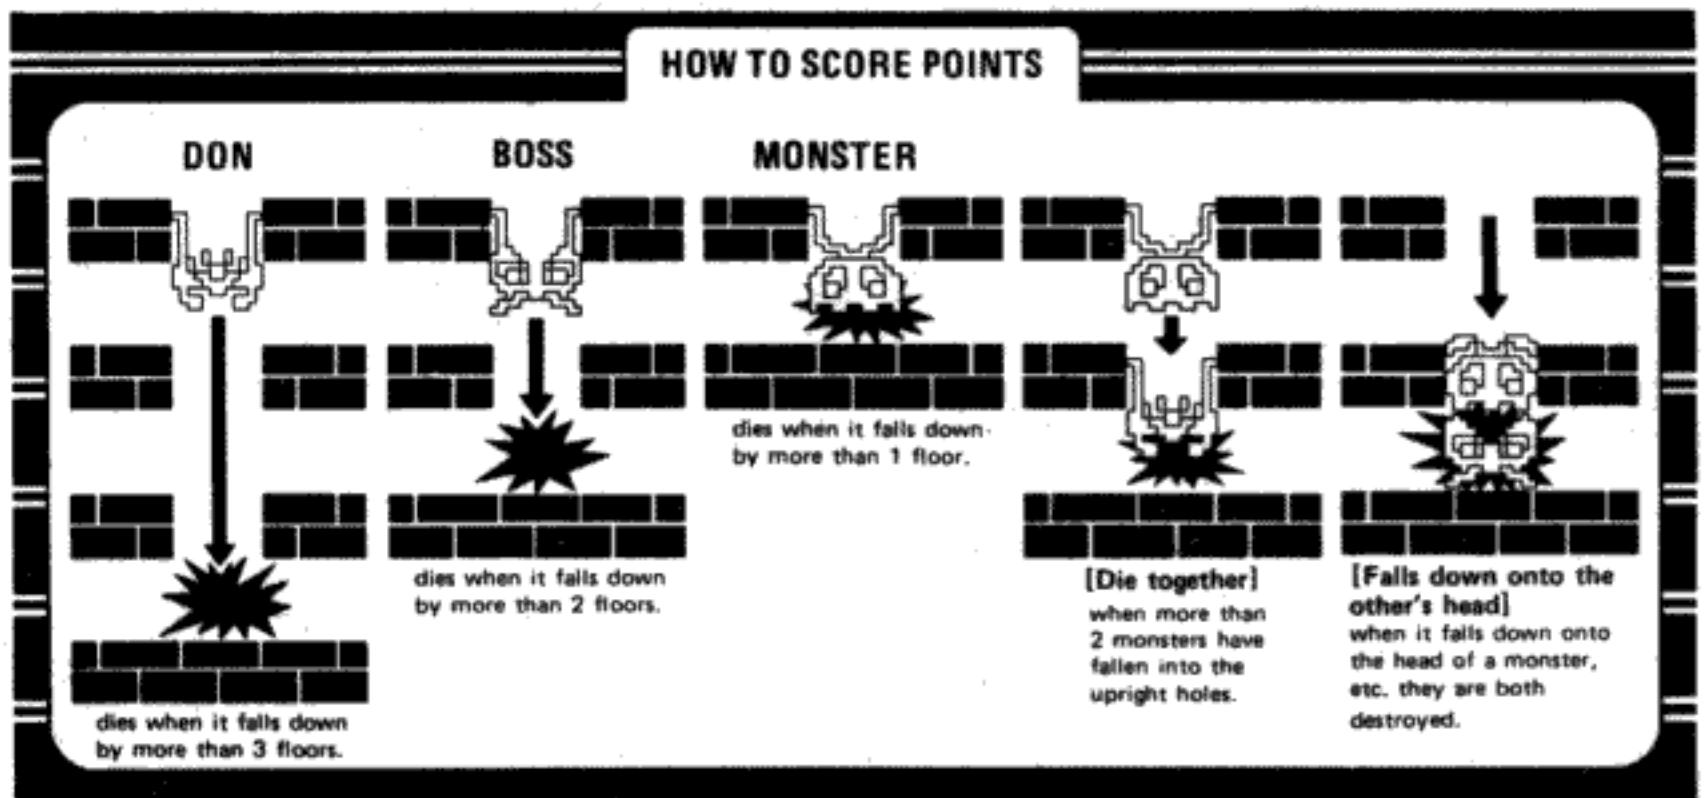

BOSS

300~1,200

DON

800~2,000

IV. VARIOUS OPTIONAL SETTINGS

A. POSITIONS OF DIP SWITCHES

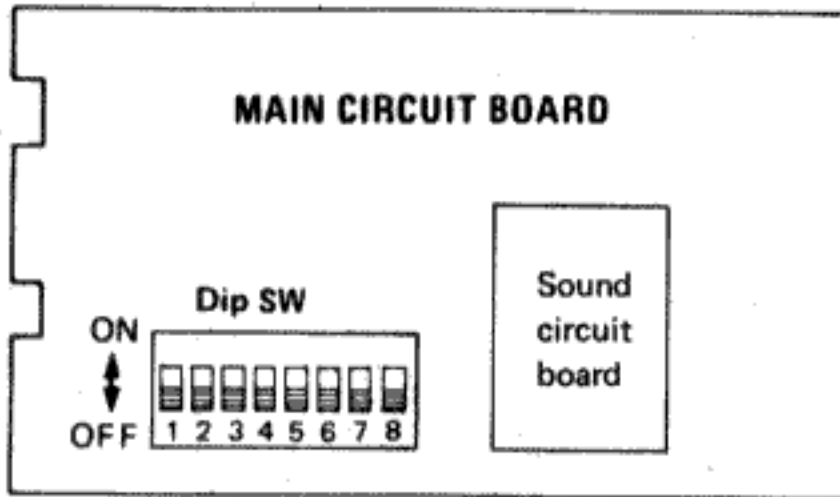

Fig. 1 Positions of Dip Switches

B. SETTING THE OPTION (DIP SWITCHES)

1. Setting the number of panic men for game (SW1)

Number of panic men	SW1
3 men	ON
4 men	OFF

2. Extra points (SW2)

Extra points	SW2
3,000 pts	ON
5,000 pts	OFF

3. Change-over setting of the mode of game (SW3)

Style	SW3
Upright	ON
Table	OFF

4. Coin/s and dredit/s for the left chute (SW4, 5, 6)

Coin	Credit	SW4	SW5	SW6
1	1	ON	ON	ON
1	2	ON	ON	OFF
1	3	ON	OFF	ON
1	4	ON	OFF	OFF
1	5	OFF	ON	ON
2	3	OFF	ON	OFF

5. Coin/s and credit/s for the right chute (SW7, 8)

Coin	Credit	SW7	SW8
2	1	ON	ON
1	1	ON	OFF
1	2	OFF	ON
1	3	OFF	OFF

C. VOLUME CONTROLLER KNOB

Fig. 2 Positions of Volume Controller Knob

V. TV MONITOR

A. ADJUSTMENT OF TV PICTURE SCREEN

Fig. 3 Positions of TV Monitor Controller Knobs

UPRIGHT TYPE

This documentation provides standard information.
Universal reserves the right to change without notice.

VI. UPRIGHT TYPE PARTS CATALOG

A. COMPONENT PARTS RELATED TO CABINET (OUTSIDE)
