T.M.N.T. II PARTS LIST

Part #	Description
063003	T.M.N.T. II P.C.B.
063100	T.M.N.T. II C.P.O.
063101	T.M.N.T. II Player Instruction
063200	T.M.N.T. II Marquee
063300	T.M.N.T. II Upper Right Side Decal
063301	T.M.N.T. II Upper Left Side Decal
063302	T.M.N.T. II Middle Right Side Decal
063303	T.M.N.T. II Middle Left Side Decal
063304	T.M.N.T. II Lower Right Side Decal
063305	T.M.N.T. II Lower Left Side Decal
063306	T.M.N.T. II P.O.P. Advertiser
063400	T.M.N.T. II Manual (4P)
40905	3 & 4 Player Harness
40901	Speaker Harness
40605	FCC Cage
40615	Kit Box
# N/A	Red Joy Stick (Microswitch)
# N/A	Blue Joy Stick (Microswitch)
# N/A	Violet Joy Stick (Microswitch)
# N/A	Orange Joy Stick (Microswitch)
30263	Red Jump Button
30264	Red Attack Button
30265	Blue Jump Button
30266	Blue Attack Button
30269	Violet Jump Button
30270	Violet Attack Button
30267	Orange Jump Button
30268	Orange Attack Button
30261	Microswitch
30262	Palnut (Plastic)

,

PUTTING YOUR BEST GAME FORWARD

PREPARATION:

For best results, all old graphics should be removed completely from the cabinet. "Stick-on" graphics can be removed by using a hairdryer or hot air device. The heat from the dryer will loosen the adhesive, allowing you to easily peel them off - any adhesive residue can be cleaned off with acetone and a soft dry cloth. (DO NOT USE ACETONE ON SURFACES PAINTED WITH FLAT PAINT.)

TOOLS YOU NEED:

- 1. Foaming Aerosol (such as "Windex").
- 2. Soft Squeegee.
- 3. X-Acto Knife.

SIDE PANEL DECALS

- 1. Spray area of cabinet where Side Panel decals are to be applied with foaming aerosol or a mild soap solution.
- 2. Remove protective backing from decals.
- 3. Position decals into place.
- 4. With a soft squeegee, beginning from the center of the decal, slowly and evenly press out excess foam until you achieve a smooth finish.
- 5. Allow to set approximately 2 to 3 hours before handling. Maximum adherence is achieved in 48 to 72 hours.

6. Trim side decal to fit your cabinet.

CONTROL PANEL OVERLAY:

- 1. Drill any new holes needed.
- 2. Plug any holes that will not be used. (A permanent epoxy-filler works well for this step.)
- 3. Pre-position the overlay prior to removing the backing.
- 4. Slowly apply the overlay inch by inch on the control panel, removing the backing as you apply it.
- 5. Once it's in place, by using an X-Acto knife, cut around the button and joystick placements.

INSTRUCTION/BUTTON DECALS:

Apply the Player Instruction, Button and 1 Player/2 Player decals in their respective positions. Apply pressure liberally. Allow to set as long as possible before putting game on location.

NOTE: Maximum adherence is achieved in 48 to 72 hours.

MARQUEE (WEAR PROTECTIVE GLASSES WHILE TRIMMING MARQUEE)

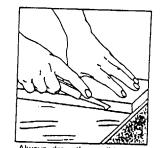

1/8" Acrylic Marquee should be cut to fit your game. DO NOT remove protective mask until this is done.

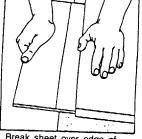

One way of cutting your Marquee is as follows: (Be sure to protect painted side of Marquee from any surface which may scratch or mar finish).

CUTTING WITH A KNIFE OR SCRIBER:

Acrylic sheet up to 3/16" thick may be cut by a method similar to that used for cutting window glass. Use a scriber of some kind — a scribing knife such as the one pictured, a metal scriber, an awl, or even a sturdy craft knife --- to score the sheet. Draw the scriber several times (7 or 8 times for a 3/16" thick piece) along a straight edge held firmly in place. It is best not to remove the protective masking. Make the cuts carefully using firm, even pressure. For best results make each stroke cleanly off the edge of the sheet.

Then clamp the acrylic sheet or hold it rigidly under a straight edge with the scribe mark hanging just over the edge of a table. Protect your hands with a cloth, and apply a sharp downward pressure to the other side of the sheet. It will break along the scratch. Scrape the edges to smooth any sharp corners. This method is not recommended for long breaks or thick material.

Always draw the scribing knife along a straight edge.

Break sheet over edge of table after scribing.

P.C.B. CAGE INSTALLATION

Konami, Inc. now supplies a new style P.C.B. cage which is superior to old style cages because of ease of installation. The cage is made of a 32 point stem-stock which is fire retardant.

TO INSTALL THE CAGE:

- 1. Open cage bottom and secure to desired P.C.B. position.
- 2. Install printed circuit board inside cage using wood screws, screwed through the cage bottom into cabinet side. 3. Close the cage over printed circuit board and secure with latch on cage.

T.M.N.T. II TECHNICAL INFORMATION

T.M.N.T. II requires horizontally mounted monitor. It also generates composite negative sync. If your monitor is composite positive sync, you will have to change to composite negative sync.

.

To alternate composite positive sync to composite negative sync, use 7404 IC or 74LS04 IC. The signal on the output pin from the P.C.B. is a combination of H-sync and V-sync.

NOTE: Please refer to Figure 2.

FIGURE 2: +5V FROM P.C. BOARD NEGATIVE COMPOSITE SYNC (PIN P on P.C.B. EDGE) (+5V and GND should be taken out	POSITIVE COMPOSITE SYNC.
TR PROBLEM:	OUBLE SHOOTING GUIDE POSSIBLE SOLUTION
No Screen or Constant Reset	 Check +5V line at the P.C.B. Adjust if necessary. Make sure all socketed eproms and custom IC's are seated securely. Apply light pressure to secure. Check harness to be sure it is not on backwards.
No Sound	 Check +12V line at the P.C.B. Make sure both speaker out wires are connected to the speakers. (DO NOT CONNECT A GROUND.)
Distorted Sound	1). Replace cabinet speaker.
I/O Problem (coin 1 doesn't work or Joystick Up doesn't work, etc.)	 Do not hook a coin counter to the coin 1 or coin 2 outputs. This will cause damage. Check your schematic for the 74LS253 IC that corresponds to your I/O problem. Check the appropriate pin with a scope or multimeter for a high output (5V), if output is low replace the 74LS253.

CAUTION

DO NOT WIRE COIN COUNTERS TO THE COIN 1 OR COIN 2 OUTPUTS. THIS WILL CAUSE DAMAGE TO THE I/O MICROCHIP 74LS253. COIN COUNTERS CAN ONLY BE WIRED TO COIN COUNTER OUTPUTS.

T.M.N.T. II MONITOR INFORMATION

SERVICE INSTRUCTIONS

NOTE: All monitors are equipped with automatic degaussing coils (L701) which demagnetize the picture tube every time the monitor is turned on after being off for a minimum of 5 minutes. Should any part of the chassis become magnetized it will be necessary to degauss the affected area with a manual degaussing coil. Move the coil slowly around the CRT face and all surrounding metal parts. Then slowly withdraw for a distance of 6 feet before turning off.

1.0 BLACK LEVEL CONTROL ADJUSTMENT

This control has been set at the factory and should not need further attention, however, when the game is connected a slight adjustment of VR201 may be necessary to obtain the proper black level (the black portion of the picture just extinguished).

2.0 VERTICAL SIZE (HEIGHT)

Location of this control is shown in Fig. 1. This control must be adjusted slowly, if necessary, until the picture or test pattern attains the correct vertical proportions.

3.0 CIRCUIT PROTECTION

A 4.0A pigtail fuse, mounted on the Main Board has been provided to protect the Power Output Circuit.

4.0 FOCUS

Adjust the focus control, located on the HV unit (T352), for maximum over-all definition and fine picture detail.

5.0 HORIZONTAL HOLD CONTROL ADJUSTMENT, VR351 (See Fig. 1)

A warm-up period of at least five minutes should be allowed before alignment is carried out. With the monitor being driven from the game signal, short TP601 to TP31. Adjust VR351 until the picture stops sliding horizontally. Remove the short.

6.0 HORIZONTAL VIDEO POSITION

If the video is off center on the raster some compensation can be made by adjusting this control.

7.0 VERTICAL RASTER POSITION ADJUSTMENT

If the video is off center vertically, (short dimension of picture tube) some compensation can be made by moving the vertical raster position adjustment jumper to either positions "U" or "D".

8.0 HORIZONTAL RASTER POSITION ADJUSTMENT

If the video is off center horizontally (long dimension of the picture tube) some compensation can be made by moving the horizontal raster position adjustment jumper to either positions "R" or "L".

9.0 HORIZONTAL WIDTH ADJUSTMENT

The horizontal width coil is a hexagonal tuning tool adjustment. This control must be adjusted slowly, if necessary, until the picture or test pattern attains the correct horizontal proportions.

• KONAMI GAMES ARE ALL NEGATIVE COMPOSIT SYNC. USE THE THREE PIN CONNECTOR ON THE MONITOR.

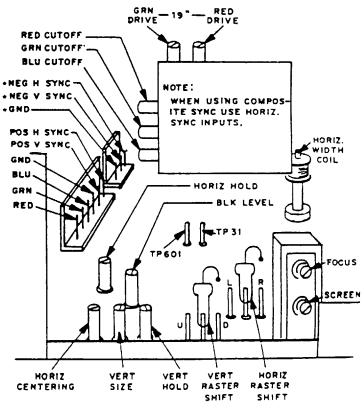

FIGURE 1

TECHNICAL INFORMATION

- Required power capacity GND-Vcc 5V 4A or more GND-(+12V)
 *See the Wiring Diagram.
- (2) Output
 - R (red) analog, positive
 - G (green) analog, positive
 - B (blue) analog, positive
 - SYNC. H-V complexed, negative
- (3) The monitor should be horizontally installed.
- (4) Use the volume knob on the PCB to adjust sound level. Turn the knob clockwise for increased volume. In monaural output mode, use the left volume knob.
- (5) Handle with care.

PLAY INSTRUCTION

- 1 to 4 players can play at the same time.
- Choose the character you want to control out of the four individual Ninja Turtles: LEONARDO (Weapon: Katana), MICHAELANGELO (Nunchaku), DONATELLA (Bo staff), or Raphael (pair of sai).
- Deposit coins into the coin slot of the character you want and press ATTACK or JUMP button to start.
- Control your character's movement using the 8-way joystick and attack enemies with ATTACK button. Press ATTACK button repeatedly to slice, slash, hurl, kick, thrust the enemies. Use JUMP button to avoid enemy attack or defeat enemies in the air. Pressing JUMP button longer makes higher jump.
- Press ATTACK and JUMP buttons simultaneously for a powerful Special Attack according to the individuality of each character.
- Press JUMP button while in the air for a flying kick or slash.
- Keep pressing JOYSTICK to run left or right. Press ATTACK button while running to tackle enemies or make a sliding attack.
- Pick up a piece of pizza to fully restore your energy or to make a revolving attack.
- Your energy will be consumed when attacked by enemies. When it is used up, you will lose one life. The game is over when you have lost all the lives.
- There are 9 stages in all. You can continue the game as many times as you want. Any player can join at any time.

CABINET INFORMATION

- (1) Use a multi control upright cabinet with four sets of an 8-way joystick and two function buttons.
- (2) Four independent coin slots are necessary. Start buttons are substituted by the function buttons for each player.

8-WAY JOYSTICK

ATTACK

SELF TEST

Normal: "OK" will be displayed. Then the game will start.

Abnormal: "BAD" will be displayed and self test will repeat. If "15B BAD" is displayed, switch off and switch on again with TEST SWITCH (on the PCB) pressed.

MANUAL TEST

(1) HOW TO START

After switching on the power, press the TEST SWITCH on the PCB or on the cabinet, and you will get the MAIN MENU of the Manual Test.

- NOTE: Switching on with TEST SWITCH pressed causes the program in the EEPROM to be initialized to default.
- (2) HOW TO RETURN TO THE GAME MODE Select "GAME MODE" on the MAIN MENU then press player 1 ATTACK button to return to the game mode.

(3) ITEMS AND HOW TO SELECT Use player 1 JOYSTICK to move arrow to desired test and press 1 ATTACK button to initiate testing. Press player 1 ATTACK button during or at the end of each test to return to the MAIN MENU.

> I/O CHECK SCREEN CHECK COLOR CHECK SOUND CHECK MASK ROM CHECK GAME OPTIONS COIN OPTIONS GAME MODE

1PLYR JOYSTICK = SELECT ITEM 1PLYR ATTACK = DO CHECK

- (4) EXPLANATION OF THE ITEMS
 - 1. I/O CHECK

Check all the joysticks and buttons to see "1" when switched on. Press player 1 and 2 ATTACK buttons at the same time to return to MAIN MENU.

2. SCREEN CHECK

Adjust focus, alignment, size, etc. using the crosshatch screen.

3. COLOR CHECK

Adjust color brightness so that the specified area will be colorless.

4. SOUND CHECK

When "SOUND SCALE CHECK" is selected, a music scale sounds. At "SOUND CODE," push player 1 JOYSTICK right/left to change sound code.

- 5. MASK ROM CHECK Roms will be checked one after another, and the message "OK" or "BAD" will be displayed on the screen.
- 6. GAME OPTIONS

Following screen will appear. Use player 1 JOYSTICK up/down to select the item and push JOYSTICK right/left to modify setting. Factory settings are shown in green, and modified results in red. (Settings below are not always the factory settings.)

T.M.N.T. II TECHNICAL INFORMATION (cont.)

After modification is completed, select "SAVE AND EXIT" and press player 1 ATTACK button to save and return to MAIN MENU.
